## GENERAL EVALUATION CHECKLIST

Please tick (X) the appropriate box in the table

| No. | Item                                                                                                                                | Yes | No | Note |
|-----|-------------------------------------------------------------------------------------------------------------------------------------|-----|----|------|
| 1   | Article title is straightforward and informative                                                                                    |     |    |      |
| 2   | Abstract is complete (Consists of introduction, methods, results, analysis, discussion and conclusions)                             |     |    |      |
| 3   | Introduction has relevant problem background                                                                                        |     |    |      |
| 4   | Introduction has relevant literature (60% journal and 40% primary sources)                                                          |     |    |      |
| 5   | Introduction has relevant theories or concepts                                                                                      |     |    |      |
| 6   | Introduction has clear research objective                                                                                           |     |    |      |
| 7   | Has related approach/overall research design/perspective                                                                            |     |    |      |
| 8   | Research method consist of : type of study, subject, object, data collection techniques, data analysis techniques with complete and |     |    |      |

|    |                                                                                                          |  |  |  |
|----|----------------------------------------------------------------------------------------------------------|--|--|--|
|    | relevant methodological basis                                                                            |  |  |  |
| 9  | General discussion shows the existence of useful findings                                                |  |  |  |
| 10 | Results and discussions contain scientific analysis and synthesis as well as credible references support |  |  |  |
| 11 | Conclusion answers the research objectives and brings something new to the science and society           |  |  |  |
| 12 | Conclusion contain recommendations which will contribute to science and society                          |  |  |  |
| 13 | Reference from at least 15 sources                                                                       |  |  |  |
| 14 | 80% of the reference sources are not more than 10 years old                                              |  |  |  |
| 15 | Article is written in proper and correct grammar                                                         |  |  |  |
| 16 | Article is authentic and a novelty                                                                       |  |  |  |
