Hello Chris

I love what you are doing with your BMW m3 and the editing, soundtracks, and overall quality really shows you know how to bring in your audience and keep them throughout the video.

I am going to be 100% honest with you, I want to help you become the 1# car channel and really bring the most out of all of your videos and increase the possibilities for customers on your page

I want to help your channel grow by increasing exposure and adding suspense to your newsletters in a way that your customers can't resist your products

I have put together a piece of work for your newsletter that I believe will help your sales and help you make more money

{link to newsletter}

what do you think of this rough draft?
