

Change the course banner image

The moment a course environment is assigned to you, it will already have a banner: an image on top of the **Course Homepage**. This image is also the thumbnail for your course in the **My Courses** widget, and therefore allows students to identify your course visually. Instructors can alter the banner to make it more appropriate for your course. Brightspace allows you to upload your own images or to make use of the Brightspace image library. Select, or create an image, that says something about your course.

Navigate from your **homepage** to your course.

1. Click on the **three dots** in the upper right corner of the banner.
2. Select **Change Image**.

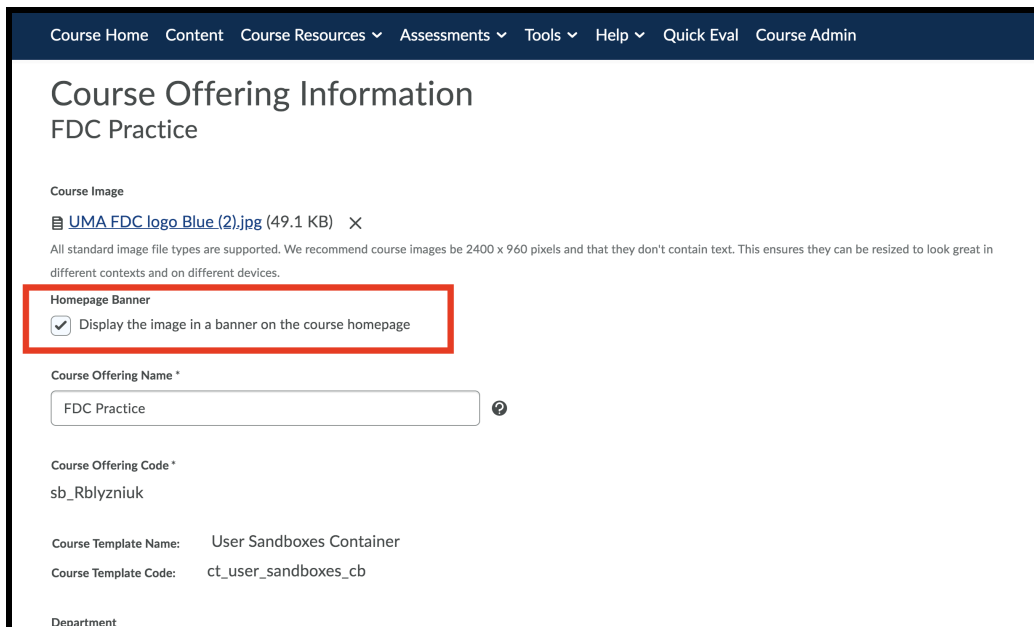

1. Scroll through the images or directly search for an image using the search bar.
2. Move your cursor to the image that you would like to use. The text **Use This Image** will appear. Click on the text and the image will be used as a banner.
3. Select **Upload** if you would like to use your own images.
4. Click on the **cross** to return to the Course Home without changing the image.

Note: An uploaded image can be depicted differently than intended due to the fact that Brightspace automatically adjusts the screen resolutions and sizes to optimize the user experience on different devices. Therefore we recommend you to stick to an image size of 2400 x 980 pixels.

Remove/recover the Course Banner

In case you don't see the option to configure the course banner, it may be disabled in the Course Admin settings. Go to **Course Admin** then **Course Offering Information**. Check the box that says **Display the image in a banner on the course homepage**; here you can also change the name of your course under **Course Offering Name**.

All standard image file types are supported. We recommend course images be 2400 x 960 pixels and that they don't contain text. This ensures they can be resized to look great in different contexts and on different devices.
