iPad Tips

1. It is very similar to use Google Classroom on an iPad, however, the 3 main tabs (Stream, Classwork, People) will be at the bottom of the screen. You still need to make sure you are logged into the student's Google Account and not another person's account.

2. If you are using a personal device not issued by the school: Download Google Docs and Google Slides from the App Store. Often you will have work to do on these applications but if they are not installed on the iPad it will not work.
