

# Module Description

## MPKP 308 Computational Chemistry

<b>Module Name</b>	Computational Chemistry
<b>Module level, if applicable</b>	Undergraduate Program
<b>Code, if applicable</b>	MPKP 308
<b>Subtitle, if applicable</b>	-
<b>Course, if applicable</b>	-
<b>Semester(s) in which the module is taught</b>	6 <sup>th</sup> Semester
<b>Module coordinator(s):</b>	Berlian Sitorus, S.Si, M.Si, M.Sc, Ph.D
<b>Lecturer</b>	Berlian Sitorus, S.Si, M.Si, M.Sc, Ph.D Ferdinand Hidayat, S.Si, M.Si
<b>Language</b>	Bahasa Indonesia
<b>Relation to curriculum</b>	Elective Courses for the undergraduate programme in Chemistry
<b>Type of teaching, contact hours</b>	<p>Decide teaching/training components for each course outcome</p> <ul style="list-style-type: none"> <li>● Theory /Face-to-face lecture (for understanding): 4 lecture meetings</li> <li>● Practical: 6</li> <li>● Seminar (for communication skills) : 1</li> <li>● Assignments: 2</li> <li>● Project: 1</li> </ul>
<b>Workload</b>	<p><i>(Estimated)</i></p> <p><i>Total workload: 2 x 2,83 hours = 5,67 hours per week.</i></p> <p><i>Contact hours (lecture): 2 x 0,83 hours = 1,66 hours per week</i></p> <p><i>Private study including examination preparation, specified in hours: 2 x 2 hours = 4 hours per week</i></p> <p><i>2 x 50 minutes lectures,</i>  <i>2 x 60 minutes practical,</i>  <i>2 x 60 minutes individual activity,</i>  <i>14 weeks per semester,</i>  <i>80 total hours</i></p>
<b>Credit points</b>	2 (3.34 ECTS)
<b>Requirements according to</b>	Registered in this course

<b>the examination regulations</b>	Minimum 75% attendance in this course				
<b>Learning goals/competencies:</b>	<p><b>Intended Learning Outcomes (ILO)</b></p> <p>After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. LO-1</li> <li>2. LO-2</li> <li>3. LO-3</li> <li>4. LO-6</li> </ol>				
<b>Module objectives</b>	<ol style="list-style-type: none"> <li>1. Students are able to describe basic concepts and calculation methods in computational chemistry</li> <li>2. Students are able to explain an appropriate computational chemistry method in predicting the physical and chemical properties of substances.</li> <li>3. Students are able to explain an appropriate computational chemistry method for molecular modelling</li> </ol>				
<b>Content:</b>	<ol style="list-style-type: none"> <li>1. Introduction of computational chemistry</li> <li>2. Calculation method in computational Chemistry</li> <li>3. Molecular mechanics method</li> <li>4. Ab initio method</li> <li>5. Semiempirical method</li> <li>6. Electron Correlation method</li> <li>7. DFT method</li> <li>8. Geometry optimization</li> <li>9. Introduction of hyperchem and gaussian</li> <li>10. Quantitative correlation between structure and chemical activity</li> </ol>				
<b>Attribute Soft skill:</b>	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting				
<b>Recommended prerequisites</b>	-				
<b>Study and examination requirements and forms of examination</b>	<p>Students are considered to be competent and pass if they get at least 50% of the maximum final grade. The final grade (NA) is calculated based on the following :</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="text-align: center;">Assessment Components</th> <th style="text-align: center;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Participation</td> <td style="text-align: center;">10%</td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	10%
Assessment Components	Percentage Contribution				
Participation	10%				

	<table border="1"> <tr> <td>Assignment</td><td>20%</td></tr> <tr> <td>Mid-semester test</td><td>35 %</td></tr> <tr> <td>Final semester test</td><td>35%</td></tr> <tr> <td>Total</td><td>100%</td></tr> </table>	Assignment	20%	Mid-semester test	35 %	Final semester test	35%	Total	100%	
Assignment	20%									
Mid-semester test	35 %									
Final semester test	35%									
Total	100%									
<b>Mid and final semester tests are carried out asa project exam.</b>										
<b>Learning Methods</b>	Case-based teaching method Project-based learning									
<b>Media employed</b>	white board; power point presentation; and e-learning system									
<b>Reading list</b>	<ol style="list-style-type: none"> <li>1. McQuarrie, D. A., 1983, Quantum Chemistry, University Science Books. California, USA</li> <li>2. Engel, T., 2019, Quantum Chemistry and Spectroscopy, Pearson. Washington, USA</li> <li>3. Cramer, C.J., 2004, Essentials of Computational Chemistry, 2<sup>nd</sup> edition, Wiley, England.</li> </ol>
