

Hi andrea,

Did you know the little known formula of marketing that will help you to increase intuitive rehab revenue by 2x?

After analysing your business I can tell you have a lot to improve to generate more revenue. The first and foremost thing is website structure, wondering why? Because the human attention span is 3 seconds and you have a big paragraph on your landing page. Tell me honestly, do you think people will read the whole paragraph? They just want to cure their pain.

What's the 2nd thing you are missing? That's the online presence you neither have any website nor the social media dedicated to your business. So, how do you think people will come to know that you have a chiropractic clinic?

If you think just establishing a chiropractor clinic will get you more patients right? But you are wrong. It's the marketing strategy that will help you. I can assure you that I can manage everything for you if you give me a chance, i will not charge anything upfront. I specialise in making websites, content and many more.
