

LESSON PLAN

*Ionel Purice,
Școala Gimnazială "Constantin Parfene", Vaslui, Romania*

Title: *The impact of energy production technologies on the individual, society and environment*

School subjects involved: Technology, Health education, ICT

Class: 7th grade

Age of students: 14 years old

Language: Romanian

Short description: Brief presentation of power plants and their impact on the environment, flora, fauna and people.

Time: 50 minutes

Keywords: power plants, energy, environment, health

Learning objectives:

- identification of the digital application necessary to carry out the task.
- presentation of the energy production impact and its use on ecosystems and individuals.

Process: Students worked in groups or individually to complete the task. It is recommended to work in a team because the students support each other to achieve their objectives. The students did the task digitally using different digital applications while respecting the requirements. The task was done especially on the students' personal phones or laptops.

Digital apps: Canva, Pixart
