

Free **Best Ringtones** for Android, iPhone, and other devices are easy to come by and sometimes beat making your own. But you need to know where to look. There are lots of ringtone websites on the web, but they're not all created equal.

Some are so full of ads that you can hardly find a real download button, others have so few options that they're not even worth checking out, and some make you pay for the ringtones.

Below is our hand-picked list of the very best free ringtone sites. Find ringtone songs and random sounds to make anyone listening to your ringer wonder where in the world you found your awesome tone.

Note: Android phones identify audio files as ringtones when they're in the MP3 format, whereas iPhones need the file to have the M4R file extension. If the ringtone you download from one of these websites isn't in the correct format for your device, use an audio converter like FileZigZag to create the right file. You can also convert MP3 to M4R with iTunes.

Important: Downloading free ringtones that were created from popular songs is most likely a copyright infringement, and we therefore don't recommend it or condone it.
