

## **UMYO – UN-Masking Your Opinion. The Future of Digital Communities**

In a world where data is power... where social networks shape our daily lives... one question remains—who truly owns our digital space?

At UMYO, we believe every organization with **5,000 or more members** deserves its **own digital community**—a space designed for **connection, security, and ownership**.

**Linktree** has over **200 million users**, built with millions in investment and costly monthly maintenance.

**Meta Workforce and Skool**—boasting **over 7 million members**—require investments in the hundreds of millions and charge an average of **\$99 per month**. We have our own version of both at a super low cost, only we are giving it back!!! Common sense solution!!

**For Organizations:** What if you could have a **custom-built** digital community—just for your organization? A place where members can **befriend, network, chat in real-time, and share privately**—all while supporting their organization.

**For Business owners and residents:** - What if you had a **digital white and yellow pages** combined with your own version of marketplace, fb, zoom (unlimited) and more all combined within each ecosystem based upon accountability? Where both can befriend, network, support and chat in a private digital ark/ecosystem based upon your own interest combined with a platform that gives back daily prizes based upon membership. At UMYO We answered your question with a Solution!!! We have been hurt so deeply that it's almost impossible to trust. But when you can see with your own eyes, it opens the door to possibility. **We are not asking for funding and investment, we are simply providing a service with the heart to give it back because we see the need. We are providing tech ownership to organizations without the hidden agenda or hidden small print. We were instructed to by a higher power to build unlimited digital arks and the people will come, we did that. When the creator says give half back to each community, we do that!!!**

**Example of Digital Cards - each industry includes its own ecosystem/ark/tribe/community** with a built in digital directory where members can network with other members in privacy without the restrictions. **1st of its KIND!!**

### [FAQ Why Are We Holding Each of Us accountable?](#)

We believe each interest needs their own ecosystem to avoid social media negativity. **If you are faith based and do not prefer to stumble on nightlife content, no more worries, they have their own digital ecosystem.** This allows each of us to no longer point the blame. It forces us to look in the mirror of self reflection. You control the key! Register based upon your interest. Common Sense??? Right???

## **A Digital Storm is Coming**

We are losing control of our data. Social media is filled with **negativity, trolls, and harmful content**—all contributing to mental health concerns.

At UMYO, we are changing the game.

We're building **digital communities based upon interest**, allowing organizations and cities to take back control. Imagine a **60/40 partnership**—where communities own and support their own technology.

Tech giants like Facebook don't owe us **40% of their profits**... but imagine if they did. Now, **we don't have to imagine**—because we're building it.

## **Empowering Cities & Organizations**

By controlling our own data, we **empower organizations, cities, and states** to take **40% of revenues** and **solve real economic needs**—without relying on **politics or government intervention**.

Think about it—every industry, every passion, every community—**united under their own digital ecosystem**:

- Medical professionals
- Faith-based organizations
- Unions & attorneys
- Restaurants & beauty industries
- Military & police officers
- Hispanic-owned & Black-owned businesses
- Political organizations (Democrats, Republicans)
- Sports Teams, Universities & HBCU
- Truckers, content creators,
- Athletes of all sports types, nightlife, entertainment, over 50, writers, authors
- ATL, DFW, Puerto Rico, Houston, Illinois
- Fraternities and Sororities

- Youth employment
- Automotive, real-estate, casinos and more

**This is the future of community-driven digital ownership.**

## **A Social Media Frenzy Like No Other**

Imagine **prize giveaways** happening every day—where **one member from each organization is chosen to go live with who wins** within their own ecosystem.

It's simple:

1. **Each organization** hosts its own **exclusive digital ecosystem** tailored for its members.
2. **UMYO handles the tech**—maintenance, hosting, updates, and support—so you can focus on what matters most.
3. **Revenue-sharing model**—20% goes to organizations, 20% back to members, creating a **sustainable financial system**.

And for **city-based communities**, 40% of revenue goes **directly to residents**.

Now, residents can **connect with businesses that truly support their community**—and businesses can **network locally, statewide, and beyond**.

## **The Time for Big Tech Dependency is Over**

No more restrictions. No more outside control. Now, **your community, your organization, your business—has a voice**.

**Welcome to UMYO.**

If you're an **organization with 5,000 or more members** and ready to claim your **own digital ecosystem**, call us at **469.382-2828** or email [icagreements@umyowallstreet.site](mailto:icagreements@umyowallstreet.site).
