

Do you have a best friend ?

My best friend :

A friend helps us in every situation. Best friends are there with us through out . We choose your friends based on common interests choices and caring towards each other . Family is given by god and friends are picked by us .

Yes I do have a best friend named Ishi. We are together from kindergarden. She has a long , black curly hair with small eyes . We were of the same height and complexion then . By nature she is sweet , cute , intelligent and smart. We both share the same ideas most of the time . The best time that we have spent with each other is when went to jungle bay and during the fab india summer camp .

One day in the class a student came and blamed me for stealing the pencil box. Just then Ishi came in and asked what was going on . On listening to that she went around the class to find if it was lying somewhere . Then she checked the student's bag and found it inbetween the books.He apologized to me and thanked Ishi.From then we became best buddies.

We rarely studied with together, but used to exchange about the books that we read. Always we were together in the school . But time has come where we had to go to different school . The separation was really hard to handle . I have asked my mother to send me to the same school where she has been too which did not happen.

“True friends are never apart , may be in distance but never in heart “.
