Our Structured Input Activity

Write your own structured input activity below. Choose a grammatical structure. Provide a text with examples of the structure in context. Have students process and respond to the text in some way. Remember that students should have to pay attention to the form and meaning in order to respond correctly. Also, remember that the response should NOT require learners to produce examples of the target form. Also, think of an extension activity students can do to personalize the topic or connect it to their lives.
