

Subject: Request to Attend the Supply Chain Conference

[Greeting]

I'd like approval to attend the Healthcare Supply Chain Technology Summit.

Given current pressures around cost containment, disruption readiness, workforce efficiency, and technology modernization, this event is highly relevant to our priorities. The agenda is focused on practical strategies in areas such as predictive analytics, automation, visibility, supplier strategy, and operational resilience.

Attending would provide actionable ideas and peer benchmarking that could help improve our supply chain performance and identify new efficiencies.

I'm confident the value of the insights and connections would outweigh the cost of attendance, and I'd be happy to share key takeaways and recommendations with the team afterward.

Please let me know if you'd approve this investment, or what further information you'd like from me to help you make a decision.

Here's a link to the event:
