

Pear Deck - a Google slides add-on to make slideshows more engaging and interactive

Source: gsuite.google.com

This video gives a good overview of Pear Deck:

[New Ed Tech - Pear Deck](#)

Benefits of using Pear Deck with Google Slides:

- Encourages students to participate -- you can see who participates whether learning at school or from home
- Students are engaged with the lesson instead of simply following along - you control the slides on their device and the interactive slides ask them to answer a question or complete a task
- Different kinds of questions and tasks can be embedded in slides, even links to go to other websites
- It is easy to incorporate into your existing slideshows

If you would like some additional support in setting up and using Pear Deck in your lessons, contact: susan.beatty@wkec.org
