Topics:

Dr. (a-leen) Alleyne please tell us who you are and what you do? Emergency physician. The doctor

that normally takes care of you. Hes in the emergency room. Works on the front lines because of recent outbreak of ebola.

Olivia: Can you talk briefly about your schedule (hours)? Emergency medicine has one of the better schedules. Before doctors used to work 36 hours. He works 10-12 hours (shift work). once you're off at work you cannot be called unless a shortage of staff. Also provides flexibility because he has no patients.

Jessica: Dr. Li please tell us who you are and what you do? Does sports medicine coverage for Pasadena isd. Almost opposite of Dr. alleyne.

Olivia: What are the worst case scenarios you will see in your clinic?

Working in an emergency room the only people who see things worse are the first responders. What you see in an emergency room aren't as exciting or quick in real life. There's always ladies who didn't know about their pregnancy and have pains. It's not class sensitive in an emergency (CEO's and homeless people are categorized together). People use sarcasm and off color humor to ease pain.

A lot of bone injuries and open fractures. Sports injuries and depending on severity is how long it lasts. Dislocations.

Any recommendations for Athletic Trainers dealing with broken bones? He considers AT to be first responders. So their management can make injury either a little better or worse. If a bone is sticking through skin it has to be handled more than someone with a minor injury.

With

have a plan and explain

Jess: suggestions for Athletic Trainers dealing with dislocations?

Olivia: What does an athletic trainer need to do if an athlete is having an asthma attack and the student does not have an inhaler?

Jess: Talk about some of the other emergencies you deal with at Neighbors Emergency Centers.

What are some tips for getting clinics like yours involved in the local sports teams health care?

We want to thank the people who helped make this podcast possible:

- G-HATS for sponsoring C.E.U. opportunities.**
- Dr. Paul Allenye from Neighbors Emergency Centers**
