

IF YOU WANT UNDENIABLE PROOF THAT NYX KNEW WHAT THE INSTANCES WERE FOR (AND SHOWING A PEDOPHILE MEME IT LIKED) GO TO SCREENSHOTS #5 AND #6.

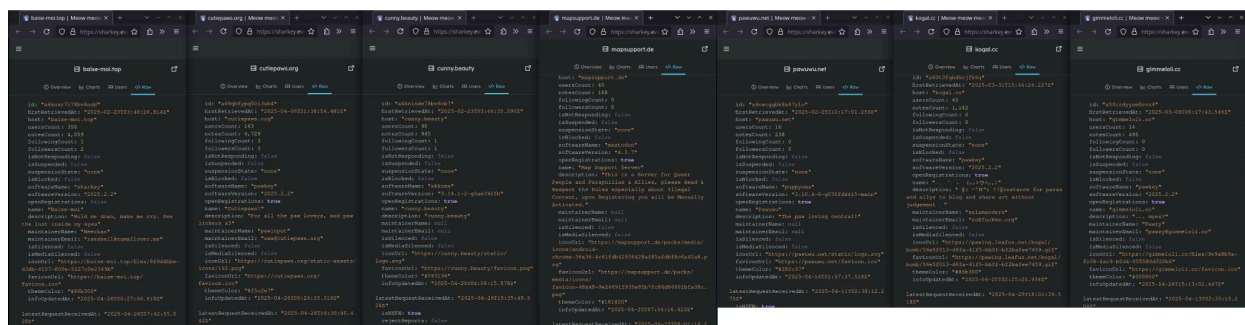

alright then. let's do this again. last time i posted about this pretty much everyone ignored it because i only provided one screenshot. that was also the first time posting something like this and i was really uncomfortable already since this was one of my *friends*. i understand that many of you are friends with nyx but you shouldn't just look past this post because you're friends and my previous post only had one screenshot in it. there is a mountain of evidence, please read the entire thread. there's screenshots and archives of everything.

nyx / everypizza (instance admin of sharkey.everypizza.im), is openly interacting with 7 pedophile instances (see screenshot #1), knowingly listing them as NSFW. none of these instances have been blocked (screenshot #2) despite nyx having said they were (screenshot #3) after my post yesterday.

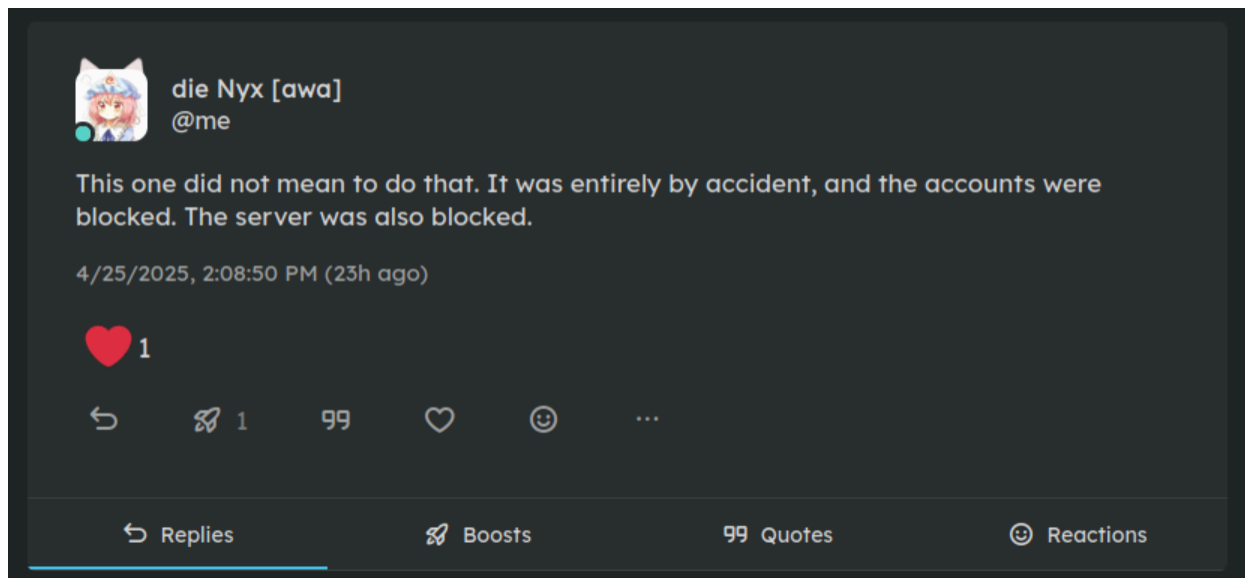

(screenshot #1)

alt: the "federation" page on nyx's sharkey that shows that its instance is federatign with cutiepaws.org, baise-moi.top, cunny.beauty, mapsupport.de, pawuwu.net, kogal.cc, and gimmeloli.cc, all of which are pedophile instances. all of those instances are also marked as NSFW.

(screenshot #2)

alt: a stitched together screenshot of multiple firefox windows in a row that all show the "raw" tab on the 7 NSFW-marked instances from the perspective of nyx's server. none of these instances are blocked, suspended, silenced/media silenced, or not responding.

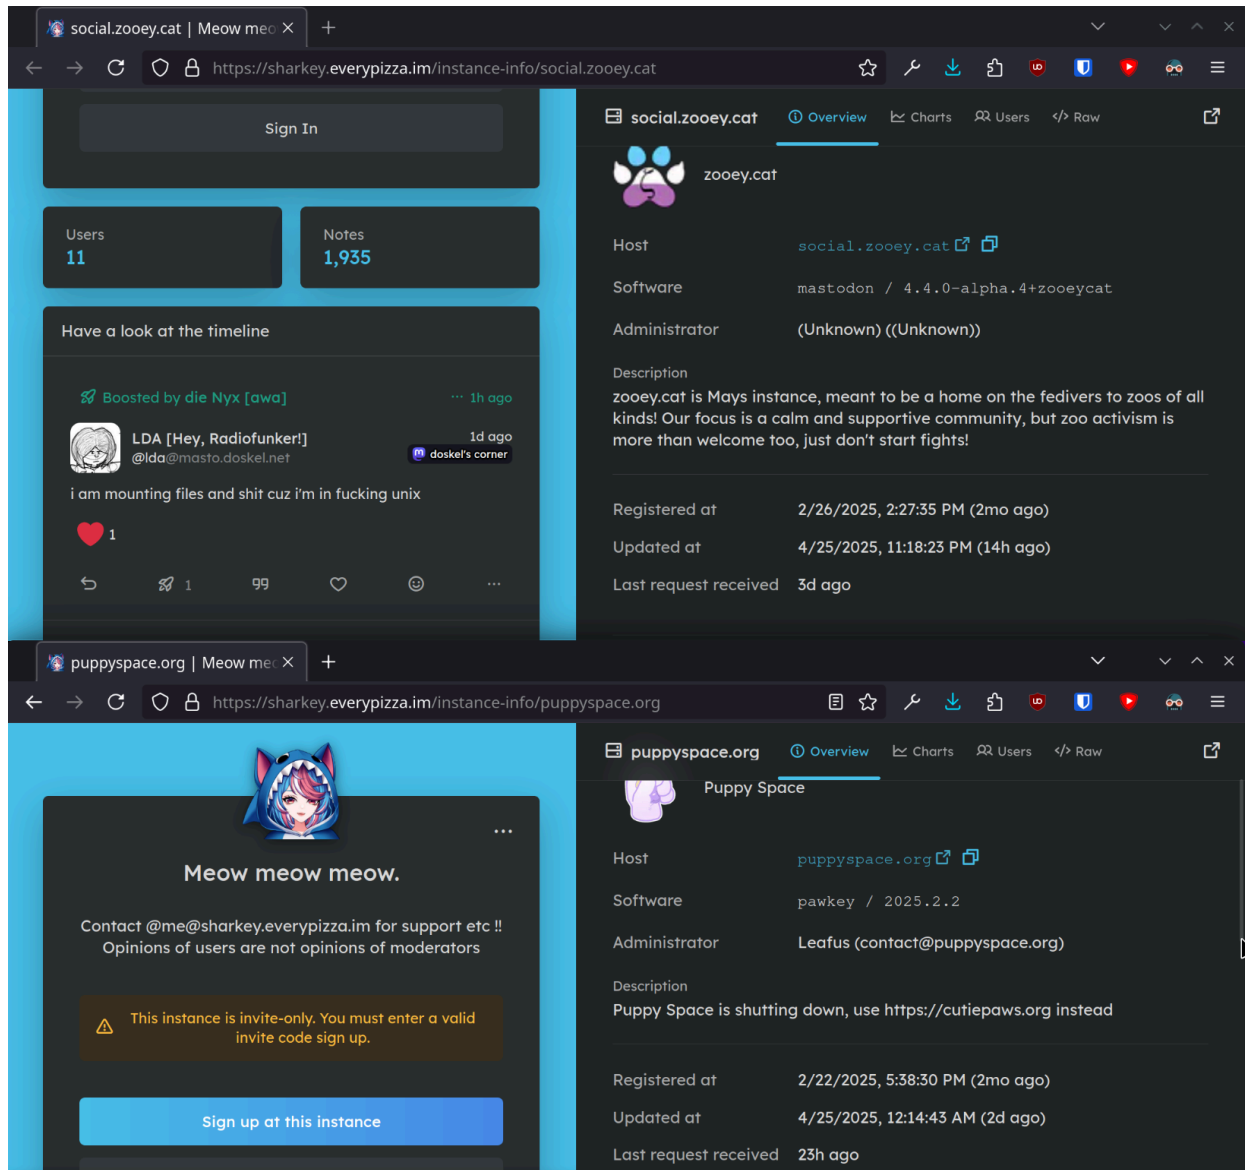

(screenshot #3)

alt: a post from nyx that reads "This one did not mean to do that. It was entirely by accident, and the accounts were blocked. The server was also blocked."

that's just the instances marked as NSFW. there are two other instances still being federated with that are of note (screenshot #4):

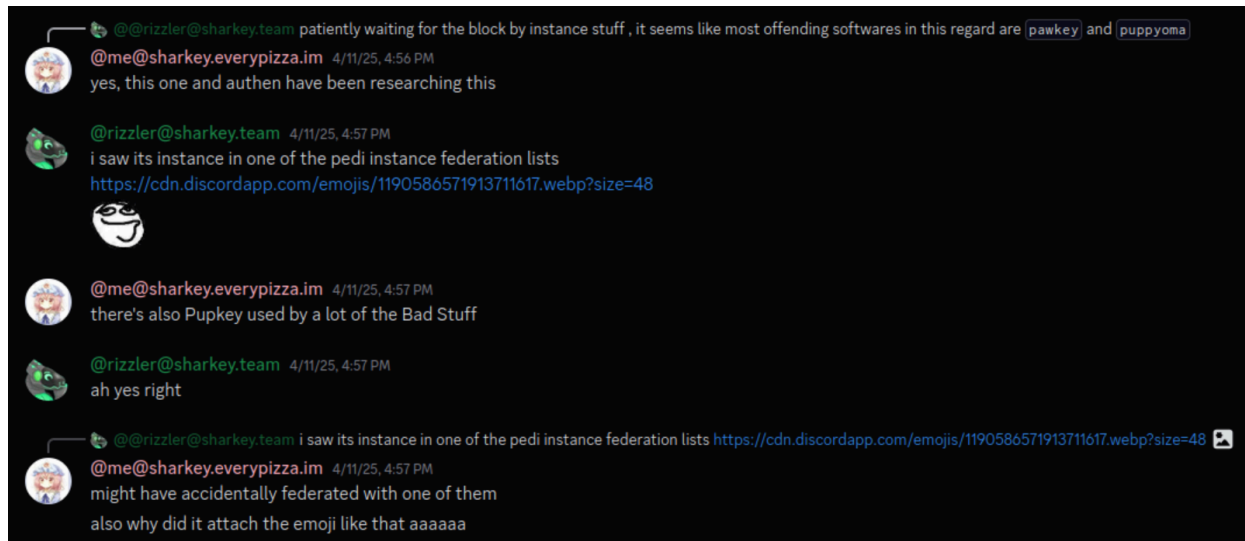

- `social.zooney.cat` (a zoophile instance, this is openly mentioned in their instance description)
- `puppyspace.org` (a pedophile instance, a little more on this later) [ADDENDUM: the "little more" did not make it because of reasons mentioned later on]

(screenshot #4)

alt: two firefox windows showing that social.zooney.cat and puppyspace.org are being federated with

nyx knows without a shadow of a doubt that the instances it's federating and actively interacting with are pedophile instances. when it was mentioned that nyx is in the federation list of one of them, it came up with an excuse that it "might have accidentally federated with one of them" (screenshot #5). nyx also knows full well that software like puppyoma, pawkey, and pupkey are mostly used by pedophile instances.

(screenshot #5)

alt: a conversation between sneezy and nyx, goes like this:

sneezy: patiently waiting for the block by instance stuff, it seems like most offending softwares in this regard are pawkey and puppyoma

nyx: yes, this one and authen have been researching this

sneezy: i saw its instance in one of the pedi instance federation lists (smug emoji)

nyx: there's also Pupkey used by a lot of the Bad Stuff

sneezy: ah yes right

nyx (in reply to sneezy's 2nd to last message): might have accidentally federated with one of them

nyx: also why did it attach the emoji like that aaaaaa

—

now onto the actual times that nyx interacted with or got interactions from pedophiles from these instances. i tried to include every single occurrence that i could find but likely didn't get everything. this will be split across more replies. [addendum: i did not go thoroughly through user profiles of pedophiles for reasons that are both pretty obvious and if not, you'll understand why soon]

there were numerous other instances that i didn't include here for reasons laid out below.

the one other thing i found when looking through profiles was the below (CW: nudity):

(screenshot #6)

alt: nyx liked a post from a user on baise-moi.top that had an image of a fake youtube video in it. the video is titled "How to make little boys cum" by "KiddieLuv" and the thumbnail shows a woman with her ass up in the air with nothing covering it.

this screenshot specifically couldn't be archived with the image but it's available here.

<https://sharkey.everypizza.im/notes/a6kxispnq50iwd30>

the archive link is here anyway. <https://archive.is/PFb12>

it was at this point where i saw a 14 year old posting a ton of pictures of themselves almost naked. thus i'm not going to dig any further into this shit. i hope this is enough to make you realize that nyx is at best a pedophile ally and at worst, a pedophile itself. to those who haven't taken this seriously, shame on you. nyx being an ""ally"" and actively interacting with pedophiles and zoophiles even after saying that it blocked "that instance" (referring to `cutiepaws.org`) and "didn't know" is fucking inexcusable. it appears that nyx did unfollow some people but there are still many that it follows. and none of these pedo instances are blocked. it

also appears that nyx removed reactions from many posts as well, probably to cover all of this up.

i really should have included more information in the initial thread but this stuff makes me feel physically sick and i just wanted to get out something quick, and i wasn't even at a computer when making that initial post. there's some more information in that original thread but i'm not going to include that here, if you want more evidence then you can check the thread here:
