

## Detailed Description

## DRX Token

### What is DRX Token (DRX)?

DRX Token is the core of the DRX ecosystem, bridging blockchain technology with the global sports industry. It empowers fans, athletes, and sports brands by providing innovative tools for engagement, loyalty rewards, and economic opportunities. Built on the Ethereum network, DRX supports a vibrant community through the SportNet app and beyond.

### How many DRX Token(s) are there in circulation?

DRX Token is planning to list in Indonesian-based CEX around February or March 2025. The total supply of DRX Token is 50,000,000,000 DRX Token. Allocations of DRX Token will be distributed into 6 categories which are presale, liquidity pool, short-term growth, long-term growth, team, and business development

**DRX Token Background**

DRX Token was founded by Kashish Mony Topandasani and Sanjev Vengada Rama. It originated from DRX Wear, an apparel company specializing in soccer jerseys. One of the major challenges in the sports industry is counterfeit merchandise, which significantly impacts the revenue of sports clubs. DRX Wear addresses this issue by integrating NFC technology into jerseys, allowing owners to scan and verify the authenticity of their apparel.

Beyond tackling counterfeit products, DRX Wear also aims to support young athletes, another pressing concern in the industry. Since its inception, DRX Wear has collaborated with five Liga 1 clubs in Indonesia—Dewa United, Madura United, Persik Kediri, PSIS Semarang, and PSM Makassar—along with one Liga 2 club, PSKC Cimahi. In 2024, DRX Wear also became the official apparel provider for Indonesia’s national pencak silat team.

Expanding beyond apparel, the co-founders also developed DRX SportNet, a comprehensive sports application for Indonesia. This platform offers live reports, real-time news, and a verification system for DRX jersey owners to authenticate their products.

DRX Token serves as the final piece in this ecosystem, connecting the sports and cryptocurrency industries. It focuses on gamification and problem-solving within the sports sector. DRX Token has introduced two interactive games: the DRX Token Telegram Mini Game and the DRX Token Penalty Game. Players can earn points by participating in these games, completing quests, and inviting friends, which can then be converted into DRX Tokens. Additional utilities of DRX Token include DRX Heroes Fund, Infinity Club, and SportSphere, further enhancing its role in revolutionizing the sports industry.

Utility		Details
DRX Heroes Fund	Legend Compassion Charity	This fund is dedicated to supporting former athletes who served the nation but now face financial hardships
DRX Heroes Fund	DRX Talent Development Initiative	The scholarship program aims to support talented children who lack financial resources to pursue their dreams in sports. Dynamic NFT (dNFT) will be created to track the statistics of these young athletes
Infinity Club	Bronze	Hold a minimum 6,666,667 DRX Token  Benefits include access to

		exclusive groups, monthly newsletters, priority customer support, and free DRX merchandise
	Silver	Hold a minimum 13,333,333 DRX Token  Benefits include all bronze benefits + event invitations, early access to exclusive features, exclusive earning opportunities, and merchandise discounts
	Gold	Hold a minimum 66,666,667 DRX Token  Benefits include all silver benefits + VIP event access, investment opportunities, limited edition merchandise, and invitation

## DRX Token x BLUM x League 1

# Questionnaire

### **What is the project about?**

DRX is a comprehensive project focusing on sports in Asia, integrating blockchain technology to revolutionize sports engagement and fan experiences. With a native cryptocurrency, DRX Token, the project supports various initiatives that foster community participation, sports sponsorship, and user interaction through gamification and unique membership perks. DRX Token is a cryptocurrency designed to power the future of sports. Combining AI, blockchain, and real-world rewards into one seamless ecosystem.

### **What makes your project unique?**

DRX Token stands out due to its integration within the sports and fitness ecosystem, combining blockchain technology with real-world applications. Unlike typical cryptocurrencies, DRX Token is directly linked to DRX's sports apparel and merchandise, which feature NFC chips embedded for authenticity verification through the DRX Sportnet app. Additionally, DRX Token plays a pivotal role in supporting Indonesia's sports industry, including funding grassroots sports development and providing financial support to legendary athletes who have contributed to the nation's sports legacy. By combining blockchain with tangible sports-related use cases, DRX Token bridges the gap between digital assets and the real-world sports economy, making it a unique offering in both the crypto and sports industries.

### **History of your project?**

DRX Token was founded by Kash Topan and Sanjev. It originated from DRX Wear, an apparel company specializing in soccer jerseys. One of the major challenges in the sports industry is counterfeit merchandise, which significantly impacts the revenue of sports clubs. DRX Wear addresses this issue by integrating NFC technology into jerseys, allowing owners to scan and verify the authenticity of their apparel.

### **What's next for your project?**

DRX Token is entering a transformative phase with several groundbreaking developments. The project is set to announce a partnership with a world-renowned esports institution, strengthening its global presence. DRX also aims to be listed on tier 1 centralized exchanges, expanding its market access. DRX Wear will integrate NFC blockchain technology, ensuring product authenticity and digital ownership. Meanwhile, DRX Sportnet will evolve through AI-powered wearables for fitness tracking and performance enhancement. For young talent, DRX will introduce dynamic NFTs as a tracker to reward and fund junior athletes. In the lifestyle segment,

DRX is developing an exclusive DRX Resort at Kepulauan Seribu and launching DRX Pay, a seamless payment solution for its ecosystem.

**What can your coin / token be used for?**

DRX Token is designed as the core utility within the DRX ecosystem, offering a range of real-world and digital use cases. Users can book sports facilities - like fields and courts - directly through the Sportnet app using DRX Tokens. Players can also earn tokens by joining matches, completing challenges, or referring new users. DRX Tokens can be used to purchase blockchain-authenticated DRX Wear, ensuring product authenticity. Holders enjoy exclusive benefits such as early access to limited drops, VIP features, and premium content. Beyond that, DRX Token can empower the community to support young athletes through token-based contributions. Additional uses include esports integration, virtual tournaments, and rewards from ecosystem partners - making DRX a token built for active engagement in sports, fashion, and gaming.
