

Medical Spa Services in Atlanta and Alpharetta, GA

Dr. Randy Rudderman has brought the same level of clinical excellence to his medical spa services that he has delivered in plastic surgery since 1989. With locations in Midtown Atlanta and Alpharetta, his practice offers a full spectrum of non-surgical treatments designed to restore skin health, enhance natural beauty, and support long-term aesthetic goals. The medical spa integrates physician-supervised care with advanced technologies, including laser therapy, microneedling, and regenerative skin treatments.

Facials

Our advanced [facial treatments](#) are tailored to your unique skin type, lifestyle, and individual goals. Whether you want to deeply cleanse, exfoliate, or boost hydration, we offer luxurious, results-driven facials that refresh your skin and promote a healthy glow.

Customized Facial

This facial is tailored to your skin's specific concerns, including dryness, congestion, or sensitivity. It is designed to support healthy skin function through gentle cleansing, exfoliation, and hydration.

Dermaplane

Dermaplaning is a non-invasive exfoliation technique that removes dead skin cells and fine facial hair. It helps create a smoother skin surface and allows for better absorption of topical products.

HydraFacial® (Standard, Deluxe, Platinum)

[HydraFacial](#) deeply cleanses, extracts, and hydrates the skin using a patented vortex infusion system. The Deluxe and Platinum options include personalized boosters and LED light therapy for enhanced skin rejuvenation.

Microdermabrasion

[Microdermabrasion](#) uses a controlled mechanical exfoliation method to improve surface texture and brighten dull skin. It is commonly used to address mild scarring, fine lines, and uneven tone.

Chemical Peels

[Chemical peels](#) remove the top layers of skin, revealing a brighter, more youthful surface. We offer a range of professional-grade peels designed to treat various conditions, including hyperpigmentation, acne, and signs of aging.

PRX Derm Perfexion

[PRX Derm Perfexion](#) stimulates dermal regeneration without peeling the skin or requiring downtime. It is ideal for improving firmness, texture, and overall skin vibrancy.

VI Peel Advanced

This medium-depth chemical peel is specifically formulated for aging skin, targeting fine lines, uneven tone, and texture. It promotes collagen production and gradually reveals smoother, healthier-looking skin.

VI Peel Precision+

VI Peel Precision+ is designed to reduce hyperpigmentation, melasma, and sun damage. It helps restore a more even and radiant skin tone with minimal downtime.

VI Peel Purify with Precision+

This peel targets active acne and post-acne discoloration while calming inflammation. It combines clarifying ingredients with brightening agents for dual-action results.

VI Peel Body

VI Peel Body is formulated to improve skin concerns on larger areas such as the back, arms, chest, or legs. It can help with acne, discoloration, stretch marks, and keratosis pilaris.

Microneedling

[Microneedling](#) stimulates your body's natural collagen production to improve tone, texture, and firmness. We offer enhanced microneedling options for even greater skin rejuvenation.

With PRP/PRFM

Microneedling with platelet-rich plasma or platelet-rich fibrin matrix promotes natural skin repair by stimulating collagen and elastin production. It is effective for improving tone, texture, and the appearance of scars.

With PRX Derm Perfexion

This treatment combines microneedling with PRX Derm Perfexion for enhanced collagen remodeling and skin tightening. It provides visible rejuvenation with minimal surface trauma.

With PRP/PRFM and Topical Daxxify®

This advanced approach blends regenerative platelet therapies with a topical neurotoxin to help soften expression lines and improve skin clarity. It is well-suited for patients seeking smoother skin with natural-looking results.

With Topical Sculptra®

This advanced approach blends regenerative platelet therapies with a topical neurotoxin to help soften expression lines and improve skin clarity. It is well-suited for patients seeking smoother skin with natural-looking results.

Vivace® RF Microneedling

[Vivace RF](#) combines microneedling with radiofrequency energy and LED therapy to address fine lines, enlarged pores, and early signs of laxity. It offers skin tightening benefits with minimal discomfort or downtime.

Laser Treatments

Our medical-grade laser treatments target everything from pigmentation and hair reduction to chronic redness and acne. Each session is carefully customized to meet your needs and achieve clear, even-toned, healthy skin.

Laser Genesis (Laser Facial)

A gentle, no-downtime laser treatment that reduces fine lines, shrinks pores, and improves texture by stimulating collagen.

Laser Pigment IPL / BBL

Targets sun damage, redness, and pigmentation using intense pulsed light or broadband light to reveal a brighter, more even complexion.

Laser Hair Removal

Offers long-term reduction of unwanted hair on the face and body. Our advanced lasers are safe for multiple skin tones.

Rosacea / Broken Capillaries

Reduces redness, visible vessels, and flushing with targeted light-based therapy for sensitive and vascular-prone skin.

Acne Treatments

Laser technology is used to minimize breakouts, reduce inflammation, and improve skin clarity without harsh topical medications.

Laser Skin Rejuvenation & Resurfacing

EVO Elluminate

EVO Elluminate is a multi-modality laser facial that addresses pigment, redness, skin laxity, and texture in a single session. It is an effective solution for patients seeking comprehensive skin rejuvenation with minimal recovery.

CO₂ CoolPeel®

CoolPeel delivers controlled CO₂ resurfacing with reduced heat, enabling skin renewal without the extended downtime associated with traditional CO₂ lasers. It helps improve fine lines, sun damage, and rough texture.

Helix CO₂ Fusion

Helix Fusion CO₂ is an advanced resurfacing system that customizes depth and intensity to suit your skin concerns. It is commonly used to improve wrinkles, scars, and overall tone with precision.

Why Choose Dr. Randy Rudderman?

- Physician-led, medically supervised treatments
- Advanced laser and regenerative technologies
- Customized protocols based on real clinical outcomes
- Focused on skin health, not just appearance
- Seamless integration with surgical and wellness care when needed

Dr. Rudderman's medical spa reflects the same clinical integrity found in his surgical practice. Every treatment is developed with precision, delivered with care, and backed by scientific evidence, not trends. Whether you're addressing signs of aging, managing acne, or simply preserving your skin's health, our approach prioritizes safety, subtlety, and sustainability.

Our goal is to help you look and feel like yourself: rested, restored, and supported at every stage. Whether you're maintaining healthy skin, preparing for surgery, or addressing specific concerns, we offer elegant, high-impact treatments that fit your lifestyle and reflect your beauty philosophy.

Begin Your Transformation Today

Skincare is not just about beauty—it's about health, confidence, and restoration. Let our experienced team help you design a treatment plan that brings your goals into focus.
