

Collect all 42 moonstones. Defeating the final boss is not necessary.

Timing starts when selecting "Yes" to create a new file and ends on collecting the 42nd moonstone. Pause menu proof required.

What it eliminates from 100%:

- The final boss (of course)
- Ancient Armor
- Nebula Armlet
- Lucky Belt (and, inherently, buying the Sandwich)
- Blood Ring
- Morning Star
- Translucent Meat farming
- Ki Spear Technique Scroll (and, inherently, buying the Chocolate Protein Shake and having to deal with Duri Fruit RNG)
- all 23 Heart Rubies, which inherently eliminates:
  - box stacking
  - the 100 Rai price for the deluxe suite at Cross Roads
  - the "pit of hell" in Dread Lands
  - the Mul Cavern Heart Ruby
  - Wooden Baton
  - that stupid backtracking quest with the love letter
  - Prince Tower second tower
  - talking to Fran any more than once (although you would have to JBJ your way up to FF)

In terms of expenses, that eliminates 1434 Rai total:

- 999 Rai (for Blood Ring)
- 200 Rai (for Morning Star)
- 100 Rai (for Chocolate Protein Shake)
- 100 Rai (for deluxe suite)
- 35 Rai (for Wooden Baton)

However, in terms of funding, you miss out on 665 Rai total:

- -300 Rai (from Fran rewards after the first)
- -15 Rai (from Translucent Meat)
- -200 Rai (from Prince Tower second tower)

That amounts to a maximum of 769 Rai that can be eliminated from the hundo financial plan.

Sadly, though, you would ideally spend the entire run with 20 HP and no Ancient Armor, so you die to everything. So, you'd probably need a buttload of backup Rai for revival, especially in Forgotten Forest.

So...

Required expenses [445-495 Rai total]:

- any% requirements
  - Rolling Technique Scroll [50 Rai]
  - Iron Hammer [120 Rai]
  - Talkinator Juice [10 Rai]
  - Flootation Donut [60 Rai]
- Lamp [90 Rai]
- Golem Hunter Vol. 7 [15 Rai]
- Mikan Fragrance [30 Rai] (accounted for through Mikan Fruit delivery quest)
- Gold Bar [50-150 Rai]

Expenses covered [540 Rai total]:

- 150 Rai from Fran
- 120 Rai from Daea prison switch puzzle
- 100 Rai from Ancient's Crater moonstone dupe
- 40 Rai from slime extermination quest
- 70 Rai from chest near Panselo moonstone
- 60 Rai from Panselo lab chest

Others [450 Rai total]:

- 80 Rai from third key room
- 30 Rai from Duri Forest exterior
- 50 Rai from Panselo anchor box chest
- 30 Rai from that one piggy bank
- 40 Rai from Panselo dojo
- 60 Rai from Atai Inn
- 100 Rai from Bandits' Lair
- 60 Rai from Misty Gorge inn

Route changes (late 2017):

- Forgotten Forest and Hidden Village between Atai backtrack and Daea backtrack
- Instead of DF key 1 dupe, clip-and-push in DF and do Atai Inn dupe
- From Mul Cavern, instead of doing Ancient's Crater, go through Sunflower Road, Duri Forest, Atai City, Forgotten Forest, and Hidden Village first
- Forgo Ancient's Crater dupe and instead dupe the other Daea prison chest

1. Panselo 1: Wooden Bat, [MS1](#)
2. Duri Forest 1: Slingshot, [MS2](#), [LD1](#), Golem Head, [LD2](#) [110]
3. Panselo 2: [LD3](#), [LD4](#), [LD5](#), Rolling Technique Scroll [180]
4. Sunflower Road 1 (buy 6 Honey, consume 1) [90]
5. Atai Bridge 1 (get to Atai)
6. Atai 1: [LD6](#), Iron Hammer, [MS3](#), Talkinator Juice [20]
7. Adar's House: Bombs
8. Atai Bridge 2: [MS4](#), [MS5](#) (free and talk to Fran here!)
9. Bandits' Lair: [LD7](#), [MS6](#), Bandit Boss [120]
10. Atai 2 (trade Bandit Boss)
11. Panselo 3 (more like plotselo)
12. Misty Gorge 1: [LD8](#), Floatation Donut, [MS7](#) [120]
13. Fran's Lab (talk to Fran once) [270]
14. Thomas' Lab (trade Golem Head)
15. Daea 1: [MS8](#), Lamp, Golem Hunter Vol. 7 [165]
16. Sunflower Road 2 (moar honey) [90]
17. Daea 2 / Prince Tower / Panselo 4: [[Sewer](#)] [MS9](#), [MS10](#), [LD9](#), [MS11](#), Javelin, [[Tower](#)] [MS12](#), [MS13](#), [[Panselo](#)] [MS14](#), [MS15](#), [MS16](#), Artifact Shard [245]
18. Great Walls 1 (talk to Gill)
19. Cross Roads: [MS17](#) (after slime quest and claiming the reward thereof) [285]
20. Dread Lands: [MS18](#), [MS19](#), [MS20](#)
21. Mul Cavern: [MS21](#), [MS22](#), [MS23](#)
22. Sunflower Road 3: [MS24](#), [MS25](#) (buy no more than 5 honey) [210 or more]
23. Duri Forest 2: Mikan Fruit
24. Atai 3: [MS26](#), Mikan Fragrance, Gold Bar, [MS27](#), [MS28](#), [MS29](#), [MS30](#) [at least 60]
25. Forgotten Forest: [MS31](#), [MS32](#), [MS33](#), [MS34](#), [MS35](#)
26. Hidden Village: [MS36](#) (even moar honey) [no need to spend any more]
27. Ancient's Crater: [MS37](#), [MS38](#)
28. Great Walls 2: [MS39](#)
29. Daea 3: [MS40](#), [MS41](#)
30. Misty Gorge 2: [MS42](#)

## Moonstone Index

1. Panselo: After you get the Wooden Bat, head right, place a box on the pressure switch, and Ladder Jump up to the top-right.
2. Duri Forest: After the first locked door, activate the switch and head all the way left. To solve the puzzle, shoot the Duri Fruit pack and then the Duri Fruit that comes from it.
3. Atai: In the shop, while buying the Iron Hammer, break a series of boxes and enter the hole covered by a grate.
4. Atai Bridge (middle screen): After freeing Fran, which is required for 100% (don't forget to talk to her!), shoot the little metal block (with your Slingshot) until it falls out and push the large metal block off of the plank, then use the duo to provide a way to roll between the next two planks.
5. Atai Bridge (E): Bomb the rightmost block above the Perro Egg.
6. Bandits' Lair: In the pit beneath where there are switches that deactivate the bridge, there is a compartment to the right blocked by rubble, the latter of which can be destroyed using a really precise bomb throw from the platform just above where you start out.
7. Misty Gorge: On the screen to the immediate right of the inn, it is on a leaf to the right of the green fish. Be sure to stay high after the Ghost Wasps disappear.
8. Daea: Climb up to the top-left sector of the bar, break the grate ahead, break the grate to the left, roll left, bomb the ceiling blockade (by using melee to push the bomb), and Pot Head Clip through the key door with the chest. If done correctly, you should obtain the moonstone while clipping.
9. Daea: In the sewers, upon entering the lower door past the big brown door, head straight right, and break the highest cracked pot in the secret crevasse.
10. Daea: Enter the save room in the center of the prison area, bomb the right wall, and destroy the left big box.
11. Daea: In the center of the prison area, head up to the top floor and enter the first door you see. Climb up the ladder, place a bomb on the right and left switches (pull out the first bomb early), smack the leftmost switch, and hit the other with either a quickly timed Slingshot round or a midair attack. (This is the method to do it with no speed boost. With a speed boost, it is significantly easier.) The moonstone is in the middle chest behind the barricade.
12. Prince Tower: On the third floor, when you see the Kobold, throw a Javelin below it that you can climb up, kill the Kobold, make the Flying Bomb explode, and set up another Javelin to let you reach the moonstone.
13. Prince Tower: On floor 7 (where the save statue is), Pot Head Clip past the barricade to find a trio of white pots, the middle of which contains the moonstone.
14. Panselo (post-Tower): At the wall on the very right, there is a place through which Gale can roll and find three boxes, the middle of which contains the moonstone. Through use

- of the Javelin, plan a Pot Head Clip setup so that one empty box is to the left of Gale, while the moonstone box, along with one other box on top of that, is on Gale's head.
15. Panselo (post-Tower): Continuing from moonstone 23, the next moonstone is in the big box to the immediate right of the chest.
  16. Panselo (post-Tower): In Ruby's house (the rightmost house), head up to the top floor using the Javelin and locate a switch to open the basement. In the basement, all the way to the left, the moonstone should be on top of a broken teleporter.
  17. Cross Roads: After MS17, climb up to the top-left of the tower ahead and talk to Gill. Then, complete the slime quest at Cross Roads and claim the reward thereof, after which you can talk to Floe, the person on the right side of the treehouse.
  18. Dread Lands: On the second screen from the south entrance, grab a Rolling Bomb at the very beginning, carry it all the way to the bottom-right area, place your own Bomb on top of it, and Door Push the O-door to gain access to three pots, the middle of which contains the moonstone.
  19. Dread Lands: Upon entering the hideout with the save statue, trigger the Rolling Bomb trap on the left and push the cracked crate down one level. Destroy the Broken Golem on the right and activate the Rolling Bomb trap farther right, and destroy the Gray Golem on the left. Afterwards, take a stationary Rolling Bomb from farther left, place it on the cracked crate, and push the duo all the way to the right. Finally, take the remaining Rolling Bombs and place them on top of the other. If done correctly, you should be able to use the Javelin to climb up to the doorway in the top-right. In that area, the moonstone is under the first cracked floor, in the far right pot.
  20. Dread Lands: Past the first X door, in the top-right sector is a cracked pot containing the moonstone. Use the Javelin from the middle-right side to navigate your way up, and use the cracked pot to Pot Head Clip past the second X door.
  21. Mul Cavern: After obtaining the Hover Boots, head back to the save statue area. From there, climb all the way up to the top-right and break the boxes.
  22. Mul Cavern: Two screens right from the room after the first save point, it should be in plain sight. Throw the Javelin at a very precise position to make your way up there.
  23. Mul Cavern: In the room before the north entrance, take the third drop from the left. This will lead you to an orange mushroom cap surrounded by caves with boxes. Break the boxes on the left.
  24. Sunflower Road (revisit, E): After passing the two side-by-side Purple Spiders where the 20-Rai chest was originally, climb up to the highest low leaf on the stalk just to the left of the next Purple Spider and hover left to find the leaf with the moonstone on it.
  25. Sunflower Road (revisit, W): Locate a duo of leaves positioned the same horizontally (past the 4th spider from the right) and hover right from the top leaf.
  26. Atai (revisit): In the prison, give a copy of Golem Hunter Vol. 7 to the blue bandit.
  27. Atai (revisit): Locate the roof with two anchor boxes on it, throw the Javelin at a precise position, and jump on the Javelin (Pixel Hover if necessary) to get up there. The moonstone is in the right of the two boxes.
  28. Atai (revisit): In the mayor's palace, enter the door past the archer, and head to a door in the bottom floor. The moonstone should be in the leftmost crate.

29. Atai (revisit): From the roof of the mayor's palace, locate a neighboring roof and hover all the way right from there using a stamina-boosting item. You should find another roof, on which lies a blue pot with the moonstone in it.
30. Atai (revisit): Go down to the well. From there, locate two switches and press them. Afterwards, keep heading right through the lowered barricades until you see three blue pots. The middle of these contains the moonstone.
31. Forgotten Forest: On the screen to the right of the one with the pressure plate puzzle, locate a branch on the very right side, hover from that branch to another branch on the left, use the Javelin to get up on the platform to the left of there, and there will be two pots, the left of which contains the moonstone.
32. Forgotten Forest: Break the blue pot high above the door to the left of the internal save statue.
33. Forgotten Forest: In the building to the immediate right of the internal save statue, break the boxes to the left to find a switch to the basement. Head into the second door from the left and break the boxes on the left side to activate another switch. Then, head to the very right door, keep going right until you happen upon a large room with a bridge to your right. Go right and then to the bottom-left to find a key (try not to provoke the robot), and head all the way right. In the top sector, behind the key door, you'll find a 35-Rai chest, as well as a trio of pots, the middle of which contains the moonstone.
34. Forgotten Forest: Two sections to the right of the internal save statue is a moonstone behind some rubble. Use the Ki Spear Technique from either the second- or third-highest tree branch (or in midair if you're precise enough) to destroy the rubble, and hover over to the moonstone.
35. Forgotten Forest: From the internal save statue, head two screens right and one screen up (or one right, one up, and one right) and locate a bridge-like structure beyond the trees. Scale your way up to the top by hovering between the bridges and branches, and at the top should be a trio of blue pots, the middle of which contains the moonstone.
36. Hidden Village: Head up to the top-left sector of the interior to find a blue harpy. Give him a Gold Bar to receive a moonstone from him.
37. Ancient's Crater: After obtaining the Artifact, head back left, locate a series of barricades protected by a tower, and disable the tower and the barricades.
38. Ancient's Crater: In the first door of the aquarium area, at the part with the blinking horizontal laser, throw a Javelin at the left wall, hover to it, and locate an invisible platform on the opposite side. From there, throw a Javelin at the right wall and hover from it to the left. Dupe the 50-Rai chest using the moonstone chest, and voilà.
39. Great Walls (revisit): In the door beside the save statue, give a bottle of Mikan Fragrance to the first guard you encounter.
40. Daea (revisit): When entering the second screen from the right, throw the Javelin at maximum height so that it hits the farthest right balcony. Use a Bomb to push yourself up on top of that Javelin, and that should grant you access to the entrance on the balcony. Keep right until you have fallen five times, after which you must take the left of the two drops ahead. Don't forget to LLC after collecting this moonstone.

41. Daea (revisit): In the prison, head left to where Ruby was the first time you came around, throw the Javelin, and locate a green pot on the ledge above. This pot contains the moonstone.
42. Misty Gorge (revisit): From the sanctuary, head upward and to the right. Follow the platform path by hovering, and you should happen upon a set of bombable blocks. Bomb those blocks, and you should find a dark cave littered with Spiky Caterpillars. At the end of this cave, an asteroid rock and the moonstone can be found.
