ABSTRACT

The abstract should be 250 words or less. Arrange the abstract with size 11 Times New Roman 1, providing that one tab is indented inward and aligned justify. The abstract section should contain objectives, methods, results, and conclusions. Keywords consist of 3-5 words. Use correct Indonesian spelling, and avoid using common and plural terms. (Abstract in Indonesian)

Keywords: first keyword, second keyword (Max 5 words)

INTRODUCTION

The authors should include a statement of the work's objectives at the conclusion of the introduction section. The authors should include a brief literature survey or review before the objective, along with a sufficient background (no more than one paragraph) that outlines the existing solutions or methods, highlights the best past research, highlights the main limitations of past research, outlines the authors' goals for resolving the limitations, and highlights the paper's scientific merits or novelties.

Using the APA 6th Edition citation style, reference citations contain the name of the author and the year of publication. An illustration of a single-author citation (Wahyudi, 2016). Anisa and Astuti's 2019 author citation is an example of two names. Examples from Ghavifekr et al. (2016) that contain more than two names in their author citations. Just the last name appears in the citation.

METHODS

Section Headings

The method explains the presentation in the form of paragraphs about the materials, research design, data source(s), data collection technique(s), types of research design data and data analysis technique(s) that are carried out by the researcher(s).

Section Headings

The method explains the presentation in the form of paragraphs about the materials, research design, data source(s), data collection technique(s), types of research design data and data analysis technique(s) that are carried out by the researcher(s).

RESULTS

Section Headings

The results of the analysis must be related to the research objectives, as well as the meaning of the results/findings carried out, compared to previous similar studies and existing theories

Section Headings

The results of the analysis must be related to the research objectives, as well as the meaning of the results/findings carried out, compared to previous similar studies and existing theories

Table

Tables are sequentially numbered with the table title and number above the table. Tables should be centered in the column OR on the page. Tables should be followed by a line space (12pt). Elements of a table should be single-spaced, however double spacing can be used to show groupings of data or to separate parts within the table. Table headings should be in 11pt bold. Tables are referred in the text by the table number without location (above, below, following, etc.), e.g.: Table 1. Do not show vertical line in the table. There is only horizontal line should be shown within the table.

Table 1. Table caption and description

Table header	Table header	Table header
Table content	Table content	Table content
Table content	Table content	Table content

Figures

Figures are sequentially numbered commencing at 1 with the figure title and number below the figure as shown in Figure 1.

Figure 1. Figure caption and description (a), (b), (c)

Equations

Equations should be numbered serially within parentheses as shown in Equation (1). Equation should be prepared using MS Equation Editor (not in image format). The equation number is to be placed at the extreme right side.

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)] \cdot \int_0^\infty \exp(-\lambda |z_j - z_i|) \lambda^{-1} J_1(\lambda r_2) J_0(\lambda r_i) d\lambda. \quad (1)$$

DISCUSSION

Section Headings

The discussion reviews the important findings according to the research objectives. Research results and data clarity are described with pictures that must be mentioned in the body of the article. The results of the analysis must be related to the research objectives, as well as the meaning of the results/findings carried out, compared to previous similar studies and existing theories

The results of the analysis must be related to the research objectives, as well as the meaning of the results/findings carried out, compared to previous similar studies and existing theories

CONCLUSION

comprises research findings presented in the form of paragraphs that either summarize the main conclusions of the discussion or serve as answers to research questions.

ACKNOWLEDGMENT

Recognize those who contributed to your research, particularly those who provided financial support. Don't mention any of the authors by name.
