### Education:

BSEE MIT, Cambridge Massachusetts, 1966

MS Nutrition and biochemistry, University of Connecticut, Storrs CT, 1977

PhD candidate biomedical engineering. Dissertation topic automated blood scanning system for the diagnosis of Lyme disease, 1993- 1995

### Employment:

Engineer Lockheed Missile and Space, Sunnyvale California 1967-1968

Systems engineer GT&E Sylvania, Mountain View California 1968-1973

Professor Electrical Engineering Technology, Hartford State Technical College, Hartford CT, 1977-1997

Computer science teacher, Maharishi International University ([MIU](#)), Fairfield, Iowa. 1998-2002

Natural Law Party candidate for US Congressional Representative from the state of Connecticut. Promoted proven solutions to many of society's problems in live debates with the incumbent, 1966

#### Advocate and Lobbyist:

Former member, advisory committee [Green Mountain Care Board](#) which regulates healthcare in Vermont. Montpelier, Vermont

He inspired [Rep. Jim McCullough](#) to submit his Vermont house bill [H.24](#). It requires health insurance to cover evidence-based prevention-oriented healthcare services which includes complementary and alternative health care services and the Transcendental Meditation ([TM.org](#)) technique. He credits TM for improving his own mental and physical health for almost 50 years.

Affiliate, [MIU Sustainable and Regenerative Living Department](#)- America's only accredited [BA](#) and [MS](#) in Regenerative Organic Agriculture

Member, Regenerate America™ ([RA](#)) by Kiss The Ground ([KTG](#))

Advocate, regenerative agriculture, Vermont, 2021- present.

The video of Walter Jenhe's and Didi Pershouse [Harvard lector](#) (2 hours) on the theory, scientific evidence and the mechanisms that agriculture is a major cause of climate change and that regenerative agriculture can reverse global warming and moderate weather extremes. A good overview of Walter's lector are Dave Borlacet's videos [Part 1](#) (15 minutes) and [Part2](#). (11 minutes)

Raising grassroots support for his friend [Rep. Jim McCullough](#) who is inspiring his fellow Vermont legislators, the administration, and delegates to congress to support regenerative organic farmers. Jim is raising their awareness that regenerative agriculture promotes individual health by producing nutrient-rich food without toxic chemicals. It also supports a healthy climate by helping to reverse global warming. Jim has represented the citizens of Williston in the Vermont State Legislature since 2003 and is the Vice Chair of the [House Committee on Natural Resources, Fish, and Wildlife](#).
