CHECKPOINT 10: ORAL PRESENTATION

Junior high students are required to do an oral report as a part of their grade. The presentation should be **one to two minutes long**. You may use your abstract as a guide for what information to include. Within the presentation, be sure to describe what you did and why, the outcome, and how you used the engineering design method in this process. Your oral presentation should be a brief summary (one to two minutes) of your project: introduce your topic, review data/tests, and summarize your entire project. **REFER TO THE GRADING RUBRIC TO HELP YOU CHOOSE WHAT TO SAY DURING THE ORAL PRESENTATION.**

Outline what you will cover in your oral presentation. Practice a few times before presenting in front of the class.

Please note: The following rubric is intended to support students in determining their quality of work. Rubrics help students understand what success looks like and what they should strive for in order to excel in the state Science and Engineering Fair. The results of this rubric are not to be used toward grade-level content grades.

ORAL PRESENTATION RUBRIC				
	2 points	**1 point**	**0 points**	**Total Points**
 **Content**	Describes the initial problem and design.	Describes either the initial problem or design but not both.	Did not describe the initial problem or design.	
	Important data/trials are fully explained.	Important data/trials are partially explained.	Did not explain important data/trials.	
	Summary connects the findings to whether the prototype solved the problem.	Summary somewhat connects the findings to whether the prototype solved the problem.	Summary does not connect the findings to whether the prototype solved the problem.	
 **Presentation Skills**		Voice was clear.	Voice was not clear.	
		Presentation was 1–2 minutes long.	Presentation was not 1–2 minutes.	
	Able to respond appropriately to questions during presentation at least two times.	Able to partially respond appropriately to questions during presentation at least two times.	Unable to respond appropriately to questions during presentation at least two times.	
			Total for Oral Presentation	**/ 10 pts**

Congratulations!

You've completed your Engineering Fair project, You should be very proud of yourself.
