

# USER MANUAL

# **LookCamPro**

This manual describes how to use this WIFI camera and install the supplied software. Be sure that you have read and understood its contents before using the camera.

## **To get started, you need:**

1. A wireless network (only support 2.4G)  
\*\*\*Use numbers and letters in creating network name and password.\*\*
2. A smart device, such as an Android Smart Phone or Tablet (Android version 6.0 or latest) or an iPhone, iPad, or iPod Touch (IOS version 8.0 or latest).

**AI**

**:**

## **LookCamPro**

## **QR Code**

Download the App “LookCamPro” from Google Play Store (for Android) or Apple Store (for iOS). Or scan the QR code to download the APP.

How to add devices on Phone :

①

②

③

IP mode setting for new device

**Add an Online device (IP Mode)**

**AP mode setting for new device**

\*\*\*AP mode for point to point , the camera can not be view remotely . the phone need to be close to the camera to be able to view the live videos. \*\*

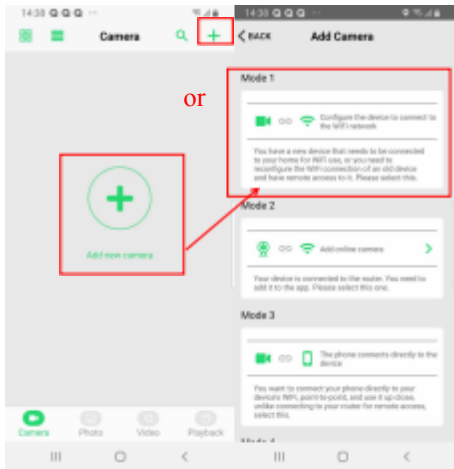

## Way ①

### \*\*\*Camera configured\*\*

Before setting, connecting the device with power supply and turn it on.

Open the “LookCamPro” App , Click + to add a new device ,when using the camera for the first time please select the “Mode 1” .

Click “Go to WIFI configuration” to connect the network same as camera’s UID (which is unique to each unit).

\*\*\*If there is no hotspot WIFI please reset the camera and wait the camera reboot\*\*

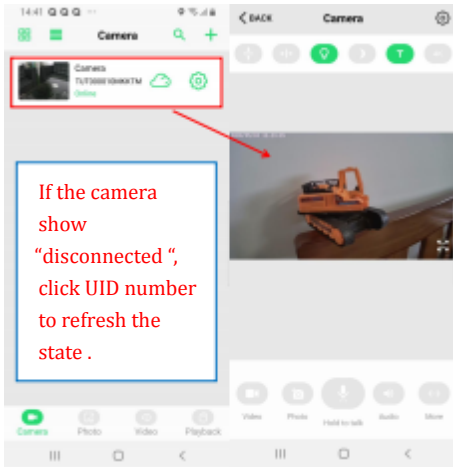

\*\*\*If your Android system phone show you that “the current WLAN network cannot access the internet. Switch to another network ?” Just ignore it. \*\*

Back to LookCamPro APP after connection is successful.

Click “ WIRELESS ACCES POINTS” to find out  
your router WIFI .

Select your home's 2.4Ghz WI-FI signal and enter the correct password. Confirm the password and connect. Then click "done". The camera will reboot. It takes about 2-5 minutes, then the camera will show online.

If the camera show  
“disconnected”,  
click UID number  
to refresh the  
state .

\*\*\*If the camera show “connection timeout”,  
That means Wi-Fi password is wrong . Please  
reset the camera ,and connect again.\*\*

## Way ②

### **\*\*\*Camera configured\*\***

The camera must be already connected to a network (IP Mode).

Open the “LookCamPro” App , Click + and please select the “Mode 2” to add a new online device

or

Input the UID number ( you also can scan the camera QR Code to get the UID number ), then input new password if changed. The default password is 6666.

The image displays two side-by-side screenshots of a mobile application interface titled "Add Camera".

**Left Screenshot:** Shows the initial form with fields for "Name" (containing "Camera"), "Cam ID" (empty), and "Password" (containing "6666"). The "Cam ID" field is highlighted with a red rectangular box.

**Right Screenshot:** Shows the same form after the "Cam ID" has been updated to "TUT080B16M9CTM". The "Password" field is now highlighted with a red rectangular box. A red arrow points from the "Cam ID" field in the left screenshot to the "Cam ID" field in the right screenshot.

Below the screenshots is a red rectangular box.

or

\*\*\*If you forgot your new password , you could reset the device and set the IP Mode again.\*\*

## Way ③
