

THERAPEUTIC GAMES AND APPS LAB
THE UNIVERSITY OF UTAH

515 E 100 S, Suite 600
SALT LAKE CITY, UT, 84103
thegapplab@gmail.com

August 7th, 2024

Congratulations, we've reviewed your application, and it is my pleasure to cordially invite you into the inaugural GApp Lab fellowship program!

As a GApp Lab fellow, you will be part of a select cohort of students who will attend seminars designed to help you understand and explore digital health, and hopefully teach you some new skills along the way. You will also be an intern in the newly launched Software Development and System Design Core working with other interns and software development professionals on digital health projects.

The fellowship is 20 hours per week; once you've accepted our offer, we'll send you more details regarding orientation and when we start up for the fall semester. We've been working hard to develop a structure that makes sense to the goals of the fellowship program, the core, our projects and most importantly you!

Please respond to this email ASAP and let us know if you are accepting the position or not. If we haven't heard back from you by the end of the week, we will be offering the fellowship to a student on the waitlist. So please, respond quickly especially since we are approaching hiring deadlines.

We're so excited to have you as we venture into an exciting new chapter for the GApp Lab!

Sincerely,

Roger Altizer, PhD
Associate Professor, Population Health Sciences
Director, Therapeutic Games and Apps Lab
Co-Director, Digital Health Initiative
