

What is your role in education?

3 responses

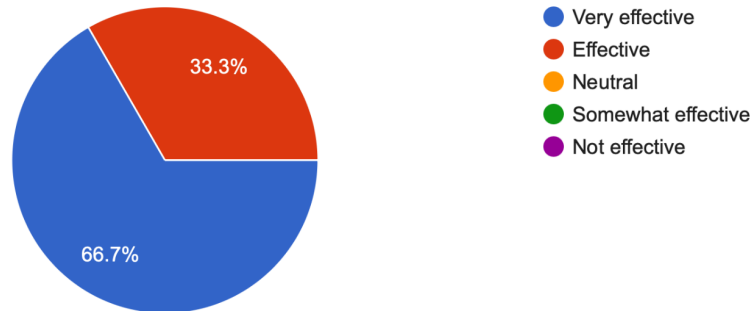

Please rate the course structure and content. Read the following statements and rate on a scale of Strongly Disagree to Strongly Agree

How effective are the use of hands-on/real-world activities and/or experiences in helping student understand and apply the course content to their project.

3 responses

Were there any parts of the course that felt unclear or difficult to engage with? Please provide examples.

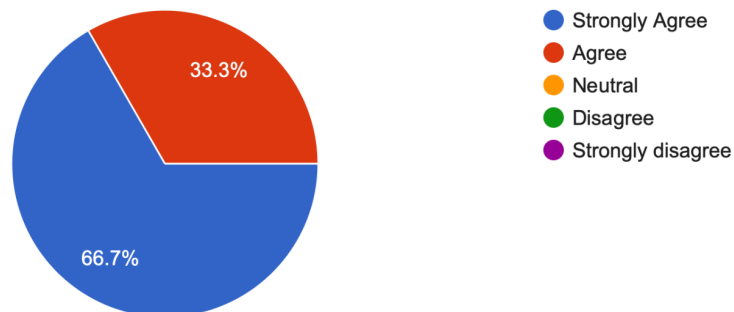

2 responses

Excellent organization and instructions

The course was easy to follow and engage with

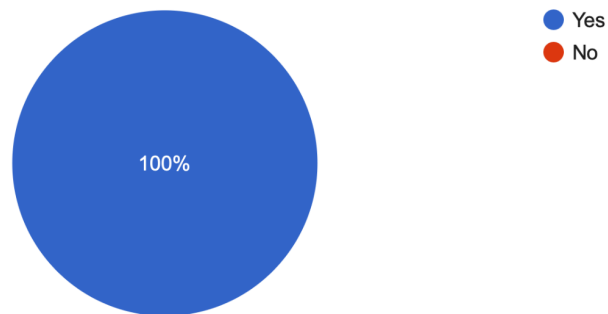

The course engages students and promotes questioning, collaboration, and participation?

3 responses

Do you feel the weekly getting started pages are important to a successful week?

3 responses

What changes or additions would you suggest to improve the course?

3 responses

This looks great! The project is well-organized and clearly presented, offering an engaging and beneficial experience that captures interest and delivers meaningful results.

The only addition I would possibly add is due dates on each of the assignments, discussion questions, etc. if you are able to. At the bottom of each module course it says "available from" "due".

Give a numerical grade with each scoring category

Any additional comments or feedback?

1 response

This is a great course! I thought it was engaging, purposeful, and has opportunities for collaboration during discussion questions!
