

1. Backend Developer

Galaxy Fight Club is seeking a Backend Engineer to join our team. You will help design and develop GFC's backend services, create trustless servers that sign messages on our smart contracts, and build databases that preserve some of the game state.

Compensation \$100 - \$150K + tokens

Responsibilities:

- You'll be gathering requirements from Product Managers, and other key internal and external stakeholders in order to determine and implement backend functionalities.
- You'll be writing production-level code in C#/node
- You'll facilitate the guiding of the proposed changes to the server side code.

Skills:

- Strong software development background (5+ years of experience)
- Experience working with open-source projects and web3
- Prior experience working with Smart Contracts in Solidity and Microsoft Azure
- Strong API design experience
- Extensive experience with C# and Node.js, preferably with JavaScript, and other modern web development technologies

2. Social Media & Content Manager

We are looking for a full-time social media and content manager to help plan out our content calendar as well as take our Twitter and Instagram presence to the next level, you will help to plan out and work with our in-house animators and graphic designers to create content including graphics, screenshots and video footage.

Compensation ±\$80K

Responsibilities:

- You will be putting together a content calendar consisting of graphics and video footage as well as other forms of content with support from in-house animator/graphic designer
- You will be posting these content on Instagram and Twitter as well as engaging with our communities

Skills:

- Strong knowledge and understanding of the Galaxy Fight Club ecosystem as well our development roadmap
- Experience in planning out content and brand development
