Hey coach,

I think you should check out TeamSnap to simplify team coordination this season!

What is TeamSnap?
TeamSnap is a free mobile app and web platform that allows coaches and parents to manage the team and stay connected in one centralized location.

- **Roster management:** You can easily edit contact information, jersey numbers, positions and more. Plus, with connected player profiles, you can get a little assist with putting names to faces at the beginning of the season.
- **Scheduling:** Event details will include the date, time and location, and any important additional information. We suggest you also use the calendar syncing tool to automatically update your personal iCal, Google or Outlook calendar with team events.
- **Communication:** Flexible messaging options allow you to message individual players, parents and coaches, or create custom groups all in one place.

Safety & Security
TeamSnap is a safe and secure platform that will not sell roster member information. Furthermore, TeamSnap teams are private, which means roster members can share team matters safely within the app.

Getting Started
New teams enjoy a 21-day free trial of TeamSnap Premium. Meaning you can track player RSVPs, store photos and files, set lineups and track team statistics all within the TeamSnap app.

Once the trial ends, you can set up payment for a subscription or switch to the free version of the app, which still gives you access to roster management, team scheduling and communication.

Thanks for your consideration!
