FOUNDATION FOR ECOLOGICAL SECURITY
JOB DESCRIPTION

JOB TITLE **:** Lead - Integration of Technical Solution

REPORTING TO : State Unit Coordinator

LOCATION **:** Raipur/Naya Raipur

****

POSITION SUMMARY:
The incumbent will primarily be responsible for adoption and integration of technological solutions in planning, implementation and monitoring of programs and efforts related to governance and conservation of commons like forest, common land and water bodies by the government and non-government actors. FES works and have developed several tech solutions for strengthening the community's capacity on solving the problems. Incumbent will be responsible for identifying the potential and design the integration process of existing mobile applications, tools and other platforms developed by FES and partners. This position is linked with the approach of working at scale i.e. impacting larger population. It is expected that incumbent oversee the evidence generation process through technological platforms, support analysis and provide feedback to the program team.

#	**PRIMARY DUTIES AND RESPONSIBILITIES (Essential functions but not exhaustive):**
1	Ensuring the integration of existing mobile based applications and other technical solutions in implementation of programs and schemes.
2	Design and roll out training and capacity building of ground level functionaries and other actors in application of different technical solutions for collecting and analysing the information and data including preparation of FAQs, leaf lets and other user-friendly materials.
3	Develop and feed partnership with government and non-government for application of tech solutions in the program implementation
4	Need assessment for technical solutions, use and integration. This includes identification of gaps and provide input to tech solution design team in development of Tools, Application, portal for the programme as per the need and feedback of target audience and departments
5	Oversee the data generation through tech platforms (in-house/ external), apply the data analytics and provide report and feedback to the program team and partners for monitoring, evaluation and studies.
6	Provide troubleshooting support in application of tech solutions by team and partners

EDUCATION/EXPERIENCE/SKILLS:
● BE/BTech/PG diploma in computer science/IT/ Data analytics/ post graduate in any subject.

- Have minimum five years of work experience with three years of work experience of integrating technical solutions for effective implementation and efficient delivery of programs at regional or state level or above.
- Have worked on data analytics and analysis of large data
- Demonstrated the initiative, proactiveness and delivering project objectives and clarity in communication at all levels.
- Learning attitude and willingness to display rigor in work
- Teamwork and appreciate plural culture

REMUNERATION & OTHER DETAILS

- FES provides contractual employment and compensation levels at FES are considered good within the development sector. The Cost to Organization (CTO) for the position is as per the project norms.
- FES is an equal opportunity organization and woman candidates are encouraged to apply. Interested candidates may send their CV to careers@fes.org.in latest by 9th October 2022.
