General rules

- **We play on interoves.com.**
- *Log in there via VK or Google. If you don't have a team yet, create a new team or apply to an existing one.*
- *Play at this link: interoves.com/games/des123/*
- *We recommend that your team call and make a copy of this Google Doc so that it is convenient to discuss tasks together in Google Doc.*
- *You can submit assignments on the site until 19:30 MSK (1,5 hours are given). After that, you can too, but new sends will not go to the tournament table. Perhaps there will be an extension of the game for half an hour or an hour, follow this in the chat of the participants.*
- *Submissions are automatically checked for compliance with the author's response. If the answer coincided with the author's - the task is read out. If not, the task is sent for additional checking with the facilitator for typos or alternative answers.*
- *For some tasks on the site you can take hints! They cost a certain number of points, which are not removed from you immediately, but only when you still pass this task.*
- *You can (and should) use anything: Google, translator, maps, write code, and so on. We hope that you use them, many tasks are very difficult or almost impossible to solve without the Internet.*
- *An online updated table of results will be available here throughout the game and after it: interoves.com/tournament_results/des123/*
- *A link to the answers will appear during the end of the game. Also on the site it will be possible to watch the answers directly on the game page.*

Recommendations

- *Google more.*
- *Write out versions to the doc.*
- *The game is a team game, you can parallelize.*

Task 1. Not a simple jewelry

In this task, we thought of words or phrases that, at the time the game starts, have an article in the English Wikipedia without redirects. Each hidden word or phrase can replace the line "an antique engagement ring" while maintaining the rhythm. That is, the title of the article should have 7 syllables, trochee, stress on 3 and 7 syllables.

You will get 3 points for each jewelry you guess.

Task 2. Spreadsheet

In this task you have a spreadsheet full of words:

 Tenner 123: Spreadsheet

Send us the name of the picture.

Task 3. Séquence

Une séquence de certains objets est déroutante. Il est important qu'il s'agisse d'une séquence, et pas seulement d'un ensemble - c'est-à-dire que l'ordre est important.

Remplissez le vide dans la séquence (là où il y a un point d'interrogation).

1.

1. ???
2. [Netflix](#)
3. [Youtube](#)
