Technical Skills

Languages and Scripts: Typescript, JavaScript, C#, GraphQL, SQL, HTML5, CSS3

Frameworks and Libraries: Next.js, ReactJs, Apollo GraphQL, React Query, Stripe, Zustand, Redux, Framer motion, Tailwind CSS, Shadcn/ui, Radix UI, GetStream, Node.js, Express, Lit, Polymer, Powerapps

Database: MySql, MongoDB, PostgreSQL

VCS: Github, Gitlab

Collaboration: JIRA, Trello, Slack, Hubstaff, Excalidraw, Notion

Experience

Dummy company

Software Engineer (Contractor)

July 2023 - Current

- Developed subscription and credit purchase functionality utilising Stripe payment gateway, enhancing revenue streams and user experience.
- Implemented a custom pricing table user interface leveraging Framer Motion library, improving visual appeal and user engagement.
- Designed and implemented a community feed feature utilising GetStream, fostering user interaction and community engagement within the platform.
- Upgraded email transaction visibility by replacing Amazon SES with Resend, enhancing monitoring and management capabilities.
- Successfully refactored a GraphQL API from JavaScript to TypeScript using GraphQL codegen, improving code maintainability, type safety, and developer productivity.
- Integrated Slack API to generate real-time notifications for various events within the platform, improving team communication and enabling prompt responses to important updates and activities.

Dummy company

Software Engineer (Contractor)

July 2023 - Current

- Refactored legacy React codebase to functional components, enhancing code maintainability and scalability.
- Implemented state management with React Query and Zustand, improving application performance and data management capabilities.
- Created and used APIs to interact with S3 bucket, enabling seamless integration and efficient management of data storage and retrieval.

Dummy company

Software Engineer

July 2022 - July 2023

- Led the initiative to rewrite low code applications built with PowerPlatform into maintainable React applications, enhancing scalability, performance, and maintainability.
- Mentored low code developers in transitioning to React, providing guidance and support to ensure successful adoption of new technologies and best practices.
- Developed applications using Microsoft PowerApps, leveraging its rapid application development capabilities to create efficient and user-friendly solutions.
- Wrote plugins using .NET for the PowerApps Platform, extending its functionality and customization capabilities to meet specific business requirements.
- Authored comprehensive documentation for applications, plugins, and development processes, ensuring clarity, consistency, and ease of understanding for stakeholders and future developers.

Associate Software Engineer

July 2021 - July 2022

- Implemented a Laboratory Information Management System (LIMS) compliant with HIPAA regulations, ensuring data security and privacy standards were met.
- Developed dashboard UI components using Polymer, enhancing the user interface and experience of the system.
- Collaborated with the team using Agile methodology, facilitating effective communication, and timely completion of project milestones.
- Created comprehensive API documentation using Postman, facilitating smooth integration and interaction with external systems and clients.
- Designed and implemented a module to generate PDF reports for patients

Software Engineer Intern

April 2021 - June 2021

- Acquired foundational knowledge of software development processes and Agile methodologies, demonstrating a commitment to continuous learning and professional growth.
- Learned the basics of a diverse skill set including Git, HTML, CSS, Vanilla JavaScript, React, and Express, laying the foundation for proficient development across frontend and backend technologies.
- Successfully completed a variety of pet projects using Vanilla JavaScript, showcasing creativity, and problem-solving abilities.

Education

Dummy University

Bachelor in Information Technology, Dummy College (Dummy University) (2017-Current)
