

VENEERS VS CROWNS

Key Differences and How to Choose

🦷 Veneers vs Crowns – Which Option Is Right for Your Smile?

If you want to improve your smile, you may wonder about veneers vs crowns. Both treatments are popular in modern dentistry, but they serve different purposes. Understanding the difference can help you choose the best solution for your teeth.

✨ Dental Veneers

Veneers are ultra-thin porcelain shells, usually 0.3–0.6 mm thick, bonded to the front surface of the teeth. Their main goal is to enhance appearance by covering issues such as stains, discoloration, small gaps, uneven shapes, or minor chips. Veneers focus on cosmetic improvement, helping create a brighter, more uniform, and natural-looking smile.

💎 Dental Crowns

A dental crown acts like a protective cap that covers the entire visible part of the tooth above the gumline. Unlike veneers, crowns are designed not only for aesthetics but also to restore strength and function. They are commonly used when a tooth is severely damaged, weakened, or needs extra protection.

🔍 When comparing veneers vs crowns, the best choice depends on your tooth condition, aesthetic goals, and overall oral health.

👉 Not sure which option suits you best?

Book a consultation at Platinum Dental Group and let our specialists help you choose the ideal treatment for a healthier, more confident smile. 😊
