

MLA Works Cited Format

[Format sources here](#)

Once you paste your list of MLA citations into your document, correct these things if necessary:

- Your Works Cited page should appear at the end of the paper.
- Works Cited is centered 1 inch from the top of the page.
- Capitalize the first word of each title and all words in the title with the exception of *the*, *at*, *to*, *in*, *a*, etc. See [Capitalization and Punctuation of Titles](#) page for more details.
- Double space the list, both between citations and within them.
- When a citation has more than one line, use a hanging indent. To do this, indent the second line, and every line thereafter, to the right one half inch or five spaces.
- Alphabetize the entire list by the first word of each citation. This may be the author's last name or the first word in a title. Ignore these words if they are the first word in a title: *a*, *an*, *the*.
- If two or more citations are by the same author, only include the name in the first entry. Thereafter, in place of the name, type three hyphens, followed by a period and the title. Arrange the works listed under the same name in order alphabetically by title.
