

Who are you? What images can you share that help us learn your story?

Warm Up

Work with your table to make some inferences. What inferences can you draw about your teacher based on this collage of images?

[Mr. Wick's Identity Collage](#)

Don't open this document until you are ready to check your inferences.

Your Challenge

How you see yourself? What does everyone need to know about you?

Create a collage (using whatever medium you would like) to describe your identity. Some things to think about could include family, gender, race, friends, ethnicity, religion, disabilities, and more. Also, be sure to include your interests and connections to others. You get to decide how many images you need, but 5 to 10 might be ideal.

Remember, your collage is meant to be a creative visual representation of your identity, so it is ok for there to be some images that make viewers wonder why the image is part of the collage.

Here are a few creation resources that might help.
