

Guiding the Kōrero today:

This session is designed to be conversational. We will not be using screen sharing or presentations. The Meet will not be recorded.

- Introductions - Open Chat to message the group e.g. share links, ask questions, comment and respond.

[How do I send chat messages to video call participants?](#)

- Describe what was happening for the group of learners you selected, their strengths and needs. Discuss evidence you have e.g. anecdotal observation, learners' blogs, data, student voice, conversations with whānau and previous teachers
- Summarise the student learning challenge you planned to focus on this year. Talk about why this is important for your school/kura i.e. what difference will this make for your learners/school?
- Your hunch - describe what you can change or do differently in order to improve learning experiences and outcomes for students. The simplest way is to say - if..... then.....

e.g. “**If** I encourage my students to write for real reasons, **then** they will be motivated to write.”

- Learning - Describe how you have acquired new knowledge and skills to make changes in your practice e.g. PLD, readings/research, ideas from your colleagues
- Taking action - describe what you are planning to do (or have done) differently.

Have you planned to regularly monitor the impact of what you are doing differently? e.g. surveying learners/whānau, Smiley Face Chart from e-asTTle, something you are already using to assess e.g. Running Record, doesn't have to be quantitative.

Is there a take out from this session that could work for you?

It would be awesome to capture a visual for our shared album.
Please take a second to smile, facilitators take a screenshot of your
team Meet, rename file with your team's name and upload to
[our shared album](#). Ngā mihi nui
