

Career and Cluster Video Project

When choosing a career, it is important to know what that job is, and what a person in that career does. By creating a short 30-60 second video, you will be showing your classmates what career you are considering. By watching these videos, your classmates will be open to other career paths they may not have considered. Exploring as many employment options as possible will help you to find your desired career.

You are going to create a short video that will describe a career you are considering in the future. But first, you will need to do some research to get basic information about the career. This link, to the [Occupational Outlook Handbook](#), should help you. You may also use other sources, if needed.

To create your video, you can use a phone app, online service or video editing program. A quick and easy website to use is [Adobe Spark](#). The requirements for the content of the video are below:

Career and Cluster Video Project Rubric

Requirement	Points Possible	Points Earned
Name of Career	1	
Career Cluster	1	
Show 3 other Careers in this Career Cluster	2	
Job Duties (What does a person in this career do?)	2	
Pay/Salary	1	
Job Growth (Will there be more or less jobs in the future?)	1	
Source(s)	1	
Music/Sound	1	
Total	10	
Put Link to your Video In Space Below:
