

Overlooking both Downtown Las Vegas and The Strip, Stadium Swim's bold design will house a massive screen for sports fans and sunseekers to catch games and entertainment of all kinds. The venue also will feature state-of-the-art Ultraviolet Light (UVL) sanitation and water-recirculation patterns, providing guests with the cleanest and healthiest public pool experience in Las Vegas.

We're building Stadium Swim to be unlike any pool in existence today and to reinvent the Vegas pool party, 365 days a year," said Circa's CEO Derek Stevens. "I can promise there will be no better location in the world to watch a big game than at Stadium Swim – even better than at the game itself. Beyond sports, it will be a great place to catch sun and listen to music, and I believe it will be a destination experience that inspires trips to Las Vegas."

Serving as the backdrop of the multifunctional pool space, a 135x41-foot, 14-million-megapixel LED screen will broadcast major games and popular televised events. To keep the party going, local artists will helm Stadium Swim's DJ booth with a daily roster of upbeat music. Additionally, two swim-up bars on the pool deck's lower level will enable guests to order a beverage without leaving the water.

Designed by Steelman Partners, the multi-tiered outdoor amphitheater will boast six pools and two spas, with 15,756 square feet of wet space. Each body of water will be a different temperature ranging from 78 to 94 degrees depending on weather conditions. The fifth-level pools will be heated to a temperature of 104 degrees on colder days, providing guests with an après ski-like sensation, all while in the heart of the desert.

A glimpse into Stadium Swim:

#### Poolside Accommodations

Guests can relax and unwind in an assortment of poolside lounge areas, including 30 cabanas and super cabanas hosting up to 25 guests. Approximately 340 chaise lounges, 38 day beds and eight poolside boxes will be offered for both hotel guests and visitors to rent. Enhanced VIP experiences will be available with tableside services including dedicated servers and towel refreshment, in addition to luxurious spaces with couches.

#### Cleanliness and Sanitation

As water cleanliness is a key priority for Stadium Swim, Circa's team conducted in-depth research on the development of a pool that can self-clean several times a day. As a result, Stadium Swim's water will be fully recirculated four to six times faster than required by codes. While typical pool filters are filled with sand, Stadium Swim's will use an activated material that is 100 percent bio-resistant and self-sterilizing glass material. This will allow for a greater surface cleaning area, resulting in clearer and healthier water that is two times more effective than if sand was used.

All eight water bodies will have UVL sanitizers, which are technologically advanced devices designed to destroy pathogens, bacteria, viruses, organic and inorganic contaminants, and

greatly reduce chlorine use. Additionally, the pools will have highly sophisticated and real-time chemical monitoring controllers in place to continuously analyze the composition of all pool and spa water, second by second. Automated chlorine and chemical-dispensing systems will instantaneously adjust water chemistry throughout the day.

STO Design Group, Inc., Circa's pool consultant, stated, "Circa has adopted by far the fastest recirculation times of any pool in Las Vegas, and has invested in the most effective filter, continuous UV light treatment of all systems, top-of-the-line water chemistry analyzers and chemical feed systems. Together, this will deliver the cleanest and most sustainable pool water in the city."

#### Food & Drink

Stadium Swim will serve up poolside fare through a collaboration between famed Michigan restaurateurs Paul Saginaw, Chris Sotiropoulos and Grace Keros. [카지노사이트존](#)

Together, Paul, Chris and Grace will bring pool-goers a selection of elevated poolside bites, with menu highlights such as lobster corn dogs with yuzu dipping sauce, fruit nachos, the Stadium Dog (Circa's twist to a Sonoran Dog), and classic favorites. Table service will be top notch, with faster delivery times thanks to the use of mobile tablets that send orders immediately to the kitchen or bar.

Saginaw is known worldwide for Zingerman's Deli, which is consistently ranked among the world's best sandwich joints. Keros and Sotiropoulos are the third-generation owners of Detroit's iconic 103-year-old American Coney Island, which made its mark on American history when it invented the Coney Dog. Both will open original concepts at Circa this fall – Saginaw's Delicatessen and Victory Burger & Wings Co., respectively.

Along with Circa, guests 21 and older staying at Stevens' sister properties – the D Las Vegas and Golden Gate Hotel & Casino – will be able to access Stadium Swim for free and can enjoy the venue one hour before it opens to the public.

Stadium Swim will be open seven days a week, excluding closures for special or private events. For guests not staying at the hotel, there will be a fee for entrance. Lounge chairs will be available to rent in two- or four-hour increments. Daybeds/cabanas will be sold with a food and beverage minimum and can be reserved all day. The pool deck also can be rented out for private events, meetings, parties and more.

Circa Resort & Casino will be Downtown Las Vegas' first ground-up casino resort since 1980. The 1.25-million-square-foot integrated resort will feature the world's largest sportsbook, stylish rooms and suites, a selection of original restaurant concepts and more.
