Students find a deck of cards and a partner or two. Shuffle and deal out all of the cards. Play a game or two of High/Low. Use your math skills to figure out the highest card set out by each player. You will win the other player's cards. Place those winning cards on the bottom of your stack. Keep the card numbers facing down until you need to put them out. Aces are the highest, then kings, queens, jacks, and followed by the numbers cards. Who won? Have fun
