"Seattle Lights" of 11/14/97

Subject: The "Seattle Lights" of 11/14/97

Look for the Phoenix flyover in March to be replaced in the media with:

"THE SEATTLE LIGHTS of 11/14/97"

Starting at about 9:06PM Pacific time, radio station, TV station, and UFO hotlines were swamped with calls about strange lights, moving at about 200 miles per hour, from west to east.

News shows on Seattle TV did show a very brief clip from a video, so you can expect networks to use same on morning shows or evening newscasts Saturday.

Norad and the USAF both report that the lights were a breakup of a Russian object that landed in the Pacific ocean. However, all eyewitnesses and the video on TV indicate the object or objects moving from west to east, inland over Washington State.

Let's see how the media will treat the Washington State flyover as they did the Arizona flyover in March. Soon we may have explanations like flares, squadrons of light planes, holographic or laser images, or secret experimental toys of the USAF. What was seen did not land in the Pacific.
