

Playson's Classic Slot Machine

The mechanism of the game is not standard. Fields are in front of the user and symbols are placed in a 3×3 pattern. Three illustrations are depicted on each reel arranged in three rows. The studio's website shows that players have five pay lines at their disposal. At the same time, Playson did not display the RTP ratio on its official platform, which can be a significant drawback when choosing options for gambling operators and players. However, public sources indicate 96.25%. For this type of slot machine, this ratio is not the highest, but it cannot be attributed to a low percentage category.

The symbolism of the game is traditional. On Reel, you can see the phrase "BAR" and seven, as well as the fruits you expect (cherry, plum, lemon) for this type of game. Slots do not contain wild symbols.

As with the game background, the control panel is an example of minimalism, with the developer choosing only the most needed buttons: the help section, spin start, and automatic games. [온라인경마](#)
