

Add anything that looks like the stuff here to this list. You can find chrome's cache by typing chrome://cache into the address bar. Use Ctrl+F and search ".cct" to find files. In here will be the urls of the files you have cached, we're looking for .cct files from myvmk.com. If you have any related vmk files in your cache, they can't hurt to note somewhere

What I have:

any hof\_furni's up to item\_3101

several of the /vmk\_clothes/ files up to 120 matching the formats below, but not non-matching formats

urls that contain the word figure between 20000-~37000

Add all new urls to the end

ctrl+f within this doc to see if the files has already been added. Adding twice shouldn't harm anything though. Just section it off and not the new section of URLs you are adding with something like this:

### TRENT FILES 01 ###

Other files to add:

Items ex)
