

Version 2.3.3

Modify logic for extracting Branch name from input parameter

Version 2.3.2

Add back in logic to detect non-blank line before or after marker line

Version 2.3.1

Add logic to only check lemma files for the subset of markers documented by Grant:

- Lemma line

- Word data

- Strong's (with or without terminating period)

- Part of speech

- Instances (any form, but must terminate with period)

- Senses

- {for each sense}

- Sense <number>

- Definition

- Glosses

- Explanation

Version 2.2.15:

Add logic to detect and report leading Roman numerals in Standard and USFM book names

Add logic to report a missing Chapter 1 in USFM form for a 1-Chapter book
Add logic to detect old Hebrew lemma link syntax

Version 2.2.14:

Add logic to run checker for branches of the main repo

Version 2.2.13:

Change report font family with serifs to better indicate where a Roman numeral was used instead of a decimal for Book names

Version 2.2.12:

Logic added to use supplied branch name instead of master for DCS repo access

Version 2.2.11:

Logic added to verify that for Citation submarker data:

- if UGNT is specified it must be preceded by a semicolon

- if English Translation is specified it must be preceded by a semicolon and terminated

- by the three to four capital letters of the translation source, enclosed in parenthesis: e.g.

(ULT),(NASB),(ESV),or (NIV)

- if either of these is specified the list of scripture links must be preceded by a colon

Version 2.2.10:

Check that Status is NOT still Needs Edit AND that it has a valid value

Check whether Lexica list has at least BDAG and LN

Version 2.2.9

Update joblog entry to indicate success or errors

Version 2.2.8

Add logic to detect old Hebrew lemma link syntax

Correct current marker processing of Greek lemma links
