

Exploring Cloud Computing and its Benefits

You may work on this worksheet with a partner (You may share a document, but you both will submit your work)

Objective: explore the concept of cloud computing, understand its benefits, and conduct research to gather additional information.

Use this [presentation/internet](#) to answer the questions below:

Questions:

1. Define cloud computing in your own words.
2. List three benefits of cloud computing.
3. Explain why cloud computing is considered **cost-effective**. (Use your critical thinking/research skills if needed)
4. Define cloud storage in your own words.

Summary of Benefits:

Write a short paragraph summarizing the benefits of cloud computing based on your understanding and research.

Help a teacher out!

Your teacher is looking for cloud computing apps that they can share with their students. These applications should help the students with **education or life skills**.

Remember a cloud computing web application

1. Research some examples of helpful web applications.
 - a. Select a web application and **type the name here:**
2. Research:
 - a. **Describe the purpose of this app**
 - b. **Explain how this application could be helpful to students**
 - c. **Read the reviews for this application and describe what the reviews generally say**
 - d. **State the cost of this application**
3. Pick up paper and drawing utensils from the front of the class draw the app logo and name and place the paper in the tray.
4. Be prepared to share your information with the class.
