Answers to vendor questions provided in red below:

1. Can we provide quotes for multiple firewall brands?

Yes, please feel free to provide multiple quotes for different firewalls. We will consider each quote separately.

2. Is SD-WAN a required feature?

No, SD-WAN is not a required feature

3. On the RFP are you actually going to give the MS/HS firewall a 2 Gbps WAN handoff, and if so, what is the carrier's device WAN type and form factor?

We have two separate fiber connections at the WUHSMS: a 1 Gbps fiber connection provided by VTel and a 1 Gbps fiber connection from EC Fiber.

4. On these multi-site jobs we always recommend running a highly qualified 3rd-party penetration test array. Would you like me to get you this quote as well?

Yes, please feel free to include a penetration test array in the quote as well.

5. Do you want to have an HA Pair or HA configuration at any of the locations?

No, we don't need an HA Pair or HA configuration at any of the locations.

6. Do you have any fiber handoffs to the firewalls? If so, do you need any transceivers needed for uplinks to the firewalls?

No, we do not have any fiber handoffs to the firewalls, all of the handoffs are ethernet.
