

MULTI RADIO APP

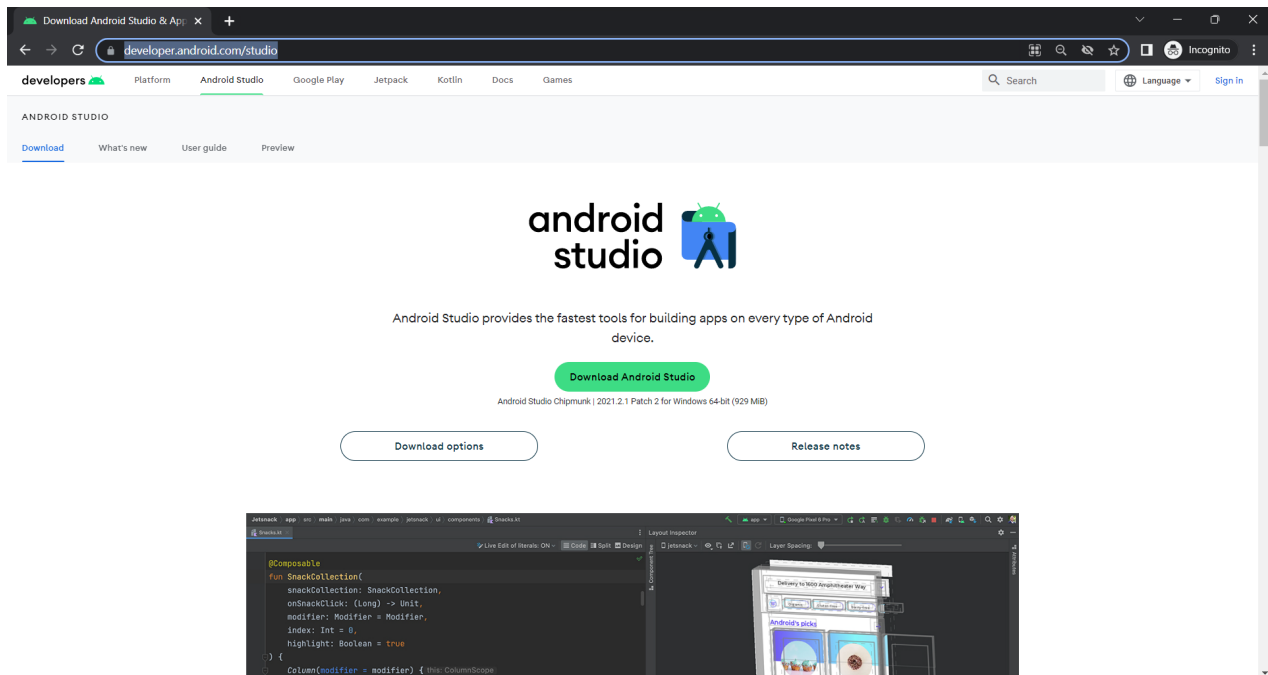

HELP DOCUMENTATION

CONTENTS

- ❖ Downloading & Installing Required Tools
- ❖ Importing Project
- ❖ Changing App Name
- ❖ Changing Package Name
- ❖ Changing App Database Url
- ❖ Changing Contents (Ad Network Config & Privacy Policy Link etc)

STEP 1: Download/install Android studio & tools.

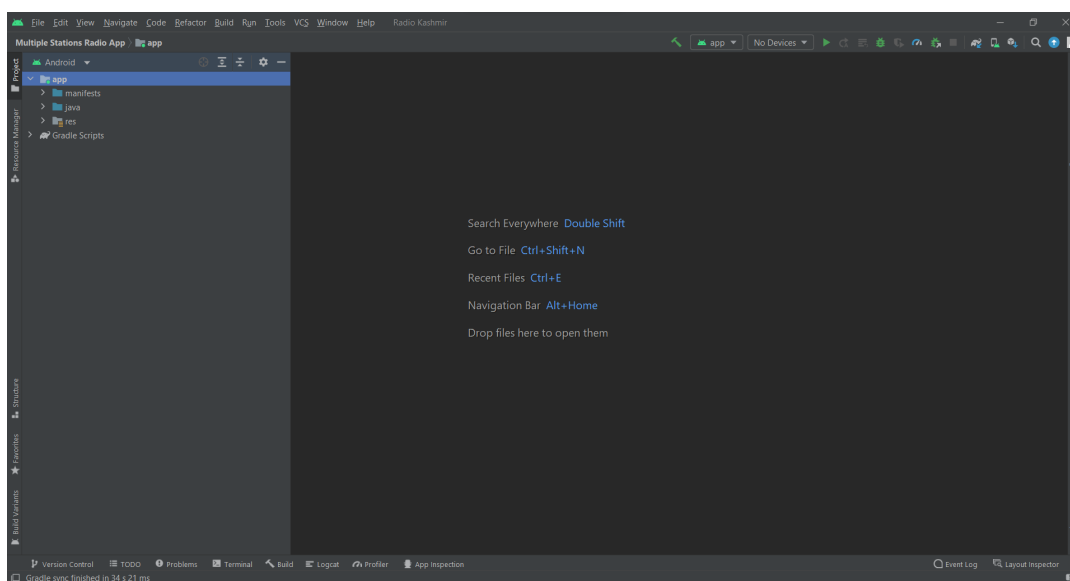

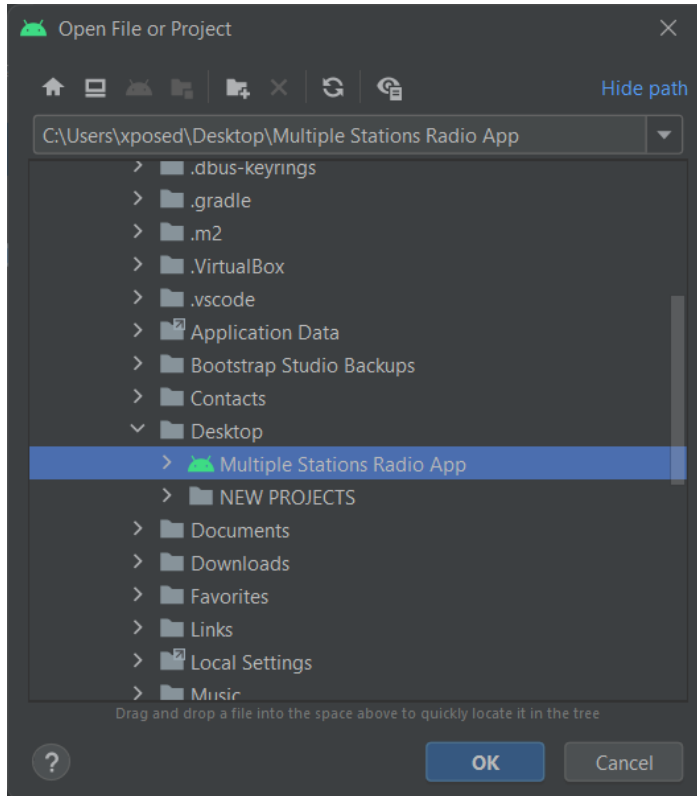

<https://developer.android.com/studio>

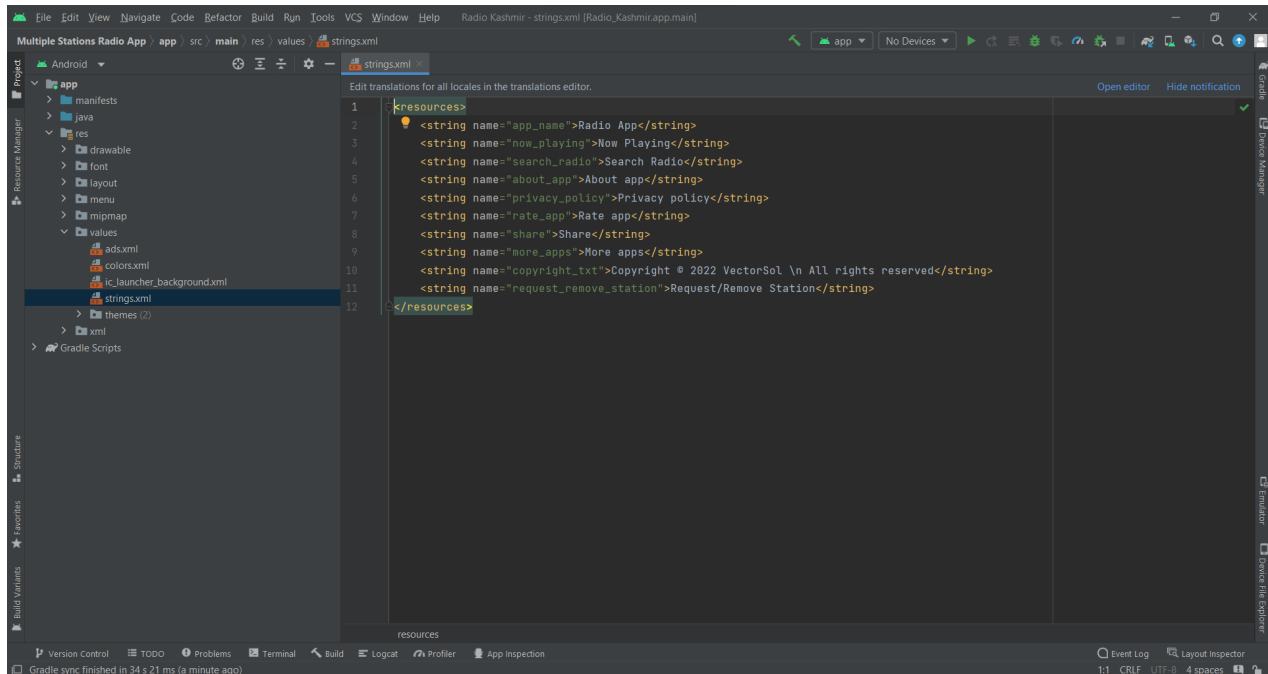

Full installation guide here:

<https://android-doc.github.io/sdk/index.html>

STEP 2: Importing Project.

STEP 3: Changing App Name.

```
<string name="app_name">Radio App</string>
```

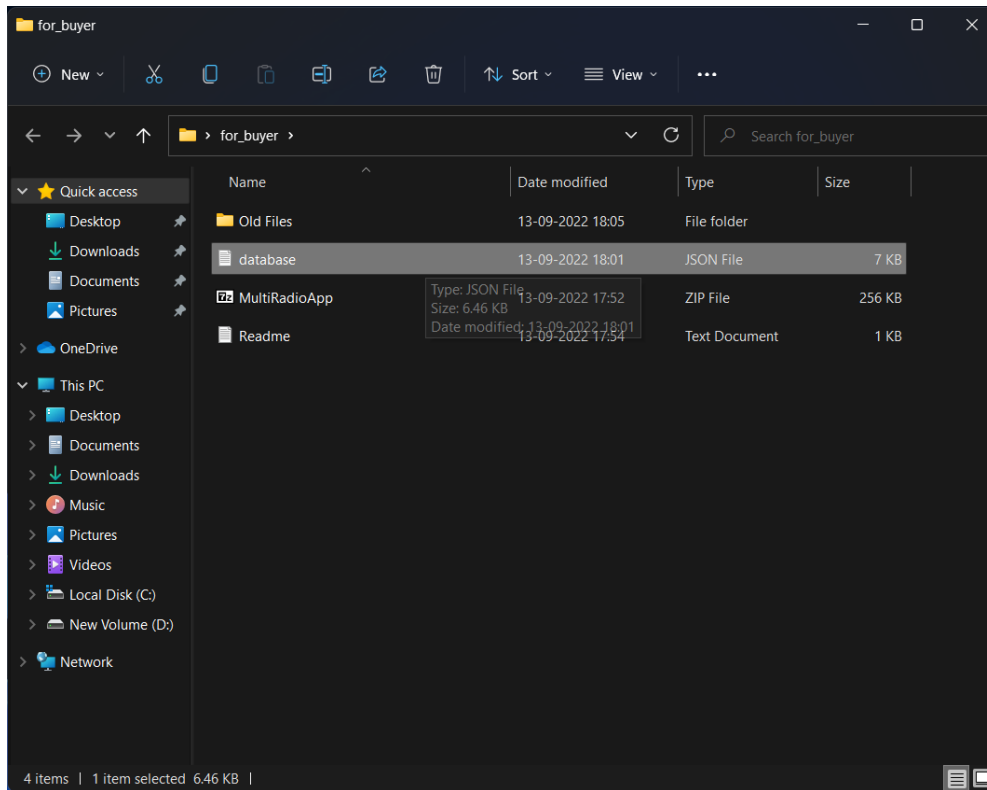

STEP 4: Changing Package Name.

Follow this tutorial

<https://www.geeksforgeeks.org/how-to-rename-package-name-in-android-studio/>

STEP 5: Changing App Database Url.

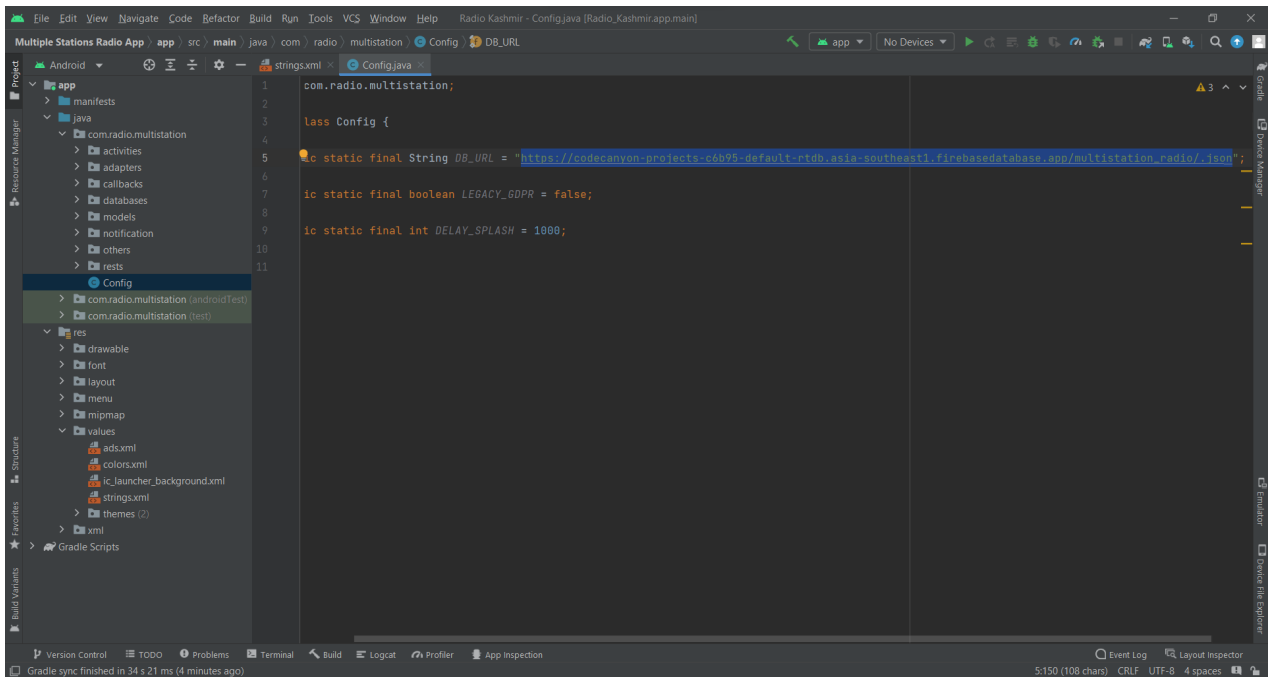

Host your **database.json** file anywhere you want

In my case I have directly hosted on Firebase Database.

After hosting the file, please copy the path url and paste in

Config.java *DB_URL*

STEP 6: Changing App Contents.

Changing Ad Network
