

BLINKIT

We are looking for enthusiastic and driven individuals who meet the following criteria:

- Currently pursuing MBA/PGDM/BBA in Logistics, Supply Chain and Operations or have an Engineering background.
- In their last semester or year of the respective course.
- Stipend of up to 10,000 INR will be provided.
- Willing to work in various locations (Punjab, Pune, Goa, Gujarat) across India and shifts as per business needs.

The selected students will be put on internship for three months, during which their performance will be closely evaluated. At the conclusion of the internship period, their performance will be comprehensively assessed, based on which candidates may be offered the position of **Assistant Store Manager with CTC upto 3.5 lpa.**

In the event that any candidate does not meet the expected performance standards, we are open to extending their internship for an additional three months. This extension aims to provide them with an opportunity to demonstrate improvement before considering them for a full-time position.

Please find the Key Roles and Responsibilities below:

The role involves operating express stores, which are cornerstones of Blinkit operations. This role is heavily invested in operations, customer experience & service levels, and quality assurance at the express stores.

- Manage dark Store operations for Blinkit in the designated region/location
- Manage all operations related to ES (Express Stores) for Blinkit in the designated region/location - full ownership of the express stores operational SLA and metrics.
- Lead all aspects of express stores operations including but not limited to inbound, inventory, last mile operations, manpower management, rostering and training.
- Ensure implementation and adherence to all SOPs as part of express stores operations.
- Performance monitoring and collaborating with operation teams on operational/customer experience metrics, including root cause analysis of problems and planning corrective actions.
- Lead, manage, and motivate a full express stores team within a time-sensitive and demanding operational environment.
- Ensuring safety & quality compliance across the premises.
- Expansion planning and budgeting.
- Communicate and negotiate with suppliers and vendors to land more profitable deals.
- Find cost-effective solutions for supply chain processes.
- Maintain supply chain inventory and records.
- Collaborate with other departments, such as Operations and Finance, to create effective business plans.
- Process enhancement improving SLA and rest factors.
- Analysing supply chain data and performance.
