

Safety First!

Review each of the rules from the National Association of Rocketry [Model Rocket Safety Code](#). Underline words about weather. **Highlight** words about the launch/landing site or other pre-launch information that you think will be especially important to consider. Circle words that you need help defining or understanding.

1. Materials. I will use only lightweight, nonmetal parts for the nose, body, and fins of my rocket.	2. Motors/Engines. I will use only certified, commercially made model rocket motors/engines, and will not tamper with these motors/engines or use them for any purposes except those recommended by the manufacturer.
3. Ignition System. I will launch my rockets with an electrical launch system and electrical motor igniters. My launch system will have a safety interlock in series with the launch switch, and will use a launch switch that returns to the "off" position.	4. Misfires. If my rocket does not launch when I press the button of my electrical launch system, I will remove the launcher's safety interlock or disconnect its battery, and will wait 60 seconds after the last launch attempt before allowing
