

MEMORANDUM

February 11, 2016
Kyiv, Ukraine

,

WHEREAS,

We understand new possibilities and challenges which blockchain technology brings to us.

We feel a great social demand for a new, reliable instrument of e-democracy.

Together, we have all the necessary competencies and capacities for the implementation of our project.

We have a responsible attitude and understanding of importance to fulfill our obligations hereunder.

hereby affirm and agree to

1. Establish a strategic partnership aimed at creation of a decentralized, transparent and accessible system for group decisions making via blockchain-based instruments.

2. Make all required efforts to create electronic voting system based on blockchain, which we call “**e-Vox**”.

3. **Cooperate** with each other and third parties to make this project successful.

4. Stick to the main **objective** that e-Vox:

- will provide reliable electronic instrument for people to develop democracy;
- will nullify or minimize the impact of any third party in the process of voting and decision making;
- will be published as open source software under the MIT License (MIT) [x11](#);
- will provide voting for

(i) **primaries and other political processes;**

(ii) **e-petitions, e-plebiscites, e-referenda;**

(iii) **e-elections or any other competitions for the positions;**

(iv) **local representatives and parliamentarians;**

(v) **any communities and other purposes.**

5. Be open for any cooperation with developers, investors, donors or other contributors and users of e-Vox, which are in line with the goals of this Memorandum.

6. Coordinate and follow the [roadmaps and plans](#).

7. This Memorandum is open for [joining](#).
