Abstract (Font Arial, 11, Bold)

Background: The body of your abstract begins here. The first part of your abstract should state the problem you set out to solve or the issue you set out to explore and explain your rationale for pursuing the project. **Purpose:** The purpose of your study is to solve this problem and/or add to your discipline's understanding of the issue. This section of the abstract should explain how you went about solving the problem or exploring the issue you identified. **Methods:** This section should include a concise description of the process by which you conducted your research. **Results:** Your abstract should list the results or outcomes of the work you have done so far. **Conclusion:** Finally, your abstract should close with a statement of overall results in a nutshell as well as the research's implications and contributions to its field. It should convince readers that the research is interesting, valuable, and worth investigating further. (Font Arial, 10, 1 spacing).

The abstract should consist of minimum 200 words and maximum 250 words.

Keywords: 3 to 5 keywords are written alphabetically under the abstract. The number of the used keyword is 3-6 words indicating the crucial words of the whole study report. The keywords should be avoiding general and plural terms and multiple concepts

INTRODUCTION (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

No more than 6 paragraphs (minimum 3 sentences in a paragraph). Introduction section contains background descriptions, research issues, key research objectives, and expectations about the benefits of the research results. The introductory section is briefly and clearly written. The author is expected to convey the results of research ever undertaken by others. Complete state of the art or review minimum 10 Journals, international journals highly recommended, at least 10 years currently related to your research. Establish research gaps (novelties). Always use word: however, rarely, not well understood, few data, presently unclear and remain a major challenge. The objective of the study, and the outcome of the study (if available). The final sentence in the introductory section is expected to be the statement of the main purpose of the study. Authors are not allowed to list any tables or figures in the Introduction. (Times New Roman, 12, 1 spacing, Justify).

METHODS (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

The method is described in detail which contains the design, population, sample and sampling technique, the workings of the study, the observed parameters, as well as technical analysis. The method is written in narrative form by conveying the important way the research is conducted. Only crucial techniques are described. Any forms of instruction, manual or technical manual in a research activity that are too detailed should not be included. The referenced methods must be completed with the citation, if the method is modified, please state the modification. Minimum 3 sentences in a paragraph. (Times New Roman, 12, 1 spacing, Justify).

RESULTS AND DISCUSSION (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

Results must be clear and concise and explained its significance in the discussion. Undue repetition in text and tables should be avoided. Comment on validity and significance of results is appropriate but broader discussion of their implication is restricted to the next section. Subheadings that aid clarity of presentation within this and the previous section are encouraged. Min.3 sentences in a paragraph. (Times New Roman, 12, 1 spacing, Justify).

Sub-Chapter Result (Times New Roman, 12, Bold, Align Left, Capitalize Each Word)

The author is expected to interpret the results and then connect them with other journals (accompanied by scientific discussions and arguments that support). Min. 3 sentences in a paragraph. Writers may include tables or graphics on the results. (Times New Roman, 12, 1 spacing, Justify).

CONCLUSION (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

It summarizes the result and answers the research question/objective. Repetition of the discussion is highly forbidden. If any suggestion of the research, it can also be outlined in this part. Manuscripts are written using 1 space line, in single column, 11point Time New Roman font, in justified text, and margins on all four sides are 2.5 cm. Conclusion and suggestion should be typed within not excess than 100 words. (Times New Roman, 12, 1 spacing, Justify).

ACKNOWLEDGEMENT (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

Only people or institutions that help to succeed the research such as the funding, volunteer, or proofreader. (Times New Roman, 12, 1 spacing, Justify).

CONFLICT OF INTEREST (TIMES NEW ROMAN, 12, BOLD, ALIGN LEFT, UPPERCASE)

The author declares that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest. (Times New Roman, 12, 1 spacing, Justify).

FUNDING INFORMATION (TIMES NEW ROMAN, 13, BOLD, ALIGN LEFT, UPPERCASE)

Institutions that finance research carried out. (Times New Roman, 12, 1 spacing, Justify).

REFERENCES (TIMES NEW ROMAN, 13, BOLD, ALIGN LEFT, UPPERCASE)

Authors are responsible for the accuracy of references cited: these should be checked against the original documents before the paper is submitted. It is vital that the references are styled correctly so that they may be hyperlinked. All references must consist minimum 15 Journals, international journals highly recommended, at least 10 years currently.

Please use the references software to cite articles for your manuscript references, such as: EndNote, Mendeley, Zotero (**free software-recommended**) with **APA 7th style**.

TABLES, FIGURES AND GRAPHICAL ABSTRACT

Tables. Tables should be embedded in page. Provide footnotes and other information (e.g., source/copyright data, explanation of boldface). Tables should be no wider than 17 cm. Condense or divide larger tables. Please submit tables as editable text and not as images. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

Parameter	Treatment			
	P0	P1	P2	P3
Feed conversation ratio (FCR)	1.80 ± 0.05 ^c	1.70 ± 0.02 ^b	1.30 ± 0.05 ^a	1.05 ± 0.05 ^d
Specific growth rate (SGR)	0.18 ± 0.005 ^a	1.22 ± 0.003 ^{ab}	1.22 ± 0.005 ^b	3.72 ± 0.009 ^c
Survival rate (SR)	41.00 ± 1.41 ^c	45.00 ± 2.01 ^b	59.00 ± 1.21 ^c	79.00 ± 1.21 ^d

Description: P0 (Control), P1 (commercial pellet feed), P2 (Feed of artificial cake), P3 (Feed *Artemia* sp.). Different superscripts in the same column shows that there are significant differences (p <0.05).

Figures. Provide figures embedded in page. Figures should be drawn professionally. Photographs should be sharp (contrast). Provide footnotes and other information (e.g., source/copyright data, explanation of boldface) in figure legend. Submit image files (e.g., electromicrograph) without text content as **high-resolution (600 dpi/ppi minimum) TIFF or JPG files**. Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Check that pictures resolution is enough to disclose important details on picture. Please check all the pictures either in the screen and the results in the print version. When examined images printed version, make sure that: color have quite a contrast, a picture is quite clear and all the labels on a picture can be read. Colored charts images are possible. Do not use dot pattern on charts since

there is possibility it can't be printed in its original. Use solid fill and contrast color in charts images.

Graphical Abstract is a single, concise, and visual summary of a research's findings. This graphic is meant to catch readers' attention and to give a better visual understanding of what the research is about. It is also intended to encourage browsing, promote interdisciplinary scholarship, and help readers identify more quickly which papers are most relevant to their research interests. There are so many online websites that provide graphical abstract's template for free. One of the many website is:
