

Key Stage 4: History

Explore your ancestry

Find out more about your family history, your ancestry, by using the sites linked below to help you. These questions might help you get started.

- Where do your parents come from?
- Where do your grandparents and great-grandparents come from?
- Has anyone in your family moved from another country or from a different area of this country?
- Does your surname come from a different country or language?
- What other surnames (such as your mother's maiden name) are in your family?

Write about what you find out and include a small picture (photo or drawing) if you can.
