Abstract

Abstracts are written in English with one space. The abstract includes a description of the objectives, methods, contribution, and results of the study. Abstracts are written briefly, concise and written in one paragraph (about 250 words) which summarizes important research variables, objectives, and methods (for example: samples and analytical techniques used), and answers to research problems (results). The font used is Cambria, size 11 pt.

Introduction [11 pt. Cambria Bold]

This section contains the research background, research objectives, research contribution (the research benefit from theoretical and practical), research result and implication (practical advice based on research result). The research result and implication in the introduction section are an only suggestion (not mandatory). Please highlight the gaps in the introduction section and mention how your study is going to address any/some of the gaps. In addition, novelty and research contribution should be well-stated, or must appear in the sentence. (Cambria, 11pt, justify, and 1.5 space).

Examples of novelty statement or gap analysis statement in the end of introduction section (after state of the art of previous research survey):

- “A few researchers focused on...”
- “There have been limited studies concerned on...”
- “Therefore, this research intends to...”
- “The objectives of this research are...”

- “This study contributes to the literature by...”
- “This research gives new contribution for the previous literatures...”
- “To bridge the gap between...”
- “To fill in this knowledge gap, this study examines...”
- “The main contribution of this study is...”
- “This research introduces the idea that...”

Method [11 pt. Cambria Bold]

This section contains the research design, subject/object/research sample, operational definition, and measurement variable, collecting data technique/instrument and data analysis also hypothesis testing. (Cambria, 11pt, justify, and 1.5 space).

Writing Formulas:

- When incorporating formulas into your document, always use the document editor’s ‘Insert’ menu, then select ‘Equation’. This feature allows you to input editable mathematical symbols and equations.
- Ensure that all equations are inserted using this feature and are fully editable within the document, as this maintains clarity and accessibility for readers and reviewers.
- Avoid using manually written equations, images of equations, or inserting equations as picture cuts.

Example:

$$Consump_{it} = \beta_0 + \beta_1 Income_{1it} + \beta_2 Fam_{2it} + \beta_3 Educ_{3it} + \beta_4 Age_{4it} + \beta_5 Region_{5it} + \epsilon_{it}$$

(1)

$$Growth = \frac{(GDP_t - GDP_{t-1})}{GDP_{t-1}} \times 100$$

(2)

Result and Discussion [11 pt. Cambria Bold]

This section presents an analysis of the results, theories, and hypotheses (if any) based on the author's reasoning. Data analysis and discussion must be presented briefly and clearly and not dominated by table presentations. The discussion includes the presentation and interpretation of the results presented in a logical manner and linked to relevant reference sources. The discussion presents the findings or analysis of research results by comparing relevant theories or previous research or with the reality in the field. The discussion also includes the author's views regarding the research findings. The tables, figures and charts presented should not be in the form of rough results but in processed form and brief summaries. (Cambria, 11pt, justify, and 1.5 space).

Tables must be numbered in the order in which they are presented. Sources are written at the bottom of the table, while numbers and titles are written at the top of the table. The table is presented in the middle of the page.

Table 1. Descriptive Statistics Results

	FP	BC	BOD	AC	CSR

Conclusion

The conclusion is the closing of the article that contains the essence and reasons the author conducts the research. Conclusions should be based on evidence drawn and presented by the author and written in paragraphs. In addition, presented the research’s implication, limitation and

advice for future research. Write the conclusion on one paragraph only. (Cambria, 11pt, justify, and 1.5 space).

Acknowledgment (Optional)

Acknowledge the parties that make the study possible such as the funding sponsor, the institution that give permission, the participants, supervisors etc. Do not acknowledge the names listed in the authors of the article. The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g.” Avoid the stilted expression “one of us (R. B. G.) thanks ...”. Instead, try “R. B. G. thanks...”. Put sponsor acknowledgments in the unnumbered footnote on the first page.

References

The composition of the bibliography used consists of 80% of the primary reference sources of journals and a maximum of 20% secondary reference sources (textbooks) published in the last 5 years. It is recommended to use a library management application (Mendeley, Zotero, Endnote, or Reference Manager). Please follow the APA style. It’s recommended for the author. (Cambria, 11pt, Justify, 1.5 Space).
