

Create 10 Blogger Accounts Safely

If you're reading this document, it means you've realized a fundamental truth: Scaling in MMO Marketing cannot be achieved with a single account. Those earning 6-7 figures monthly all share one thing in common: They operate dozens, even hundreds of accounts simultaneously.

But here's the biggest challenge: How do you prevent Blogger from discovering that all accounts are managed by one person? This is precisely why 90% of beginners fail within their first month.

Case Studies: When Everything Collapses

****Case 1: Media Buyer Loses \$50,000****

John built 30 Facebook Ads accounts, revenue \$50K/month. One day, Facebook ran algorithm scan and discovered all 30 accounts linked together. Total ban. Lost 18 months of building.

****Case 2: Dropshipper with 15 Shopify Stores****

Sarah operated 15 Shopify stores, each store revenue \$10K/month. Stripe detected identical device fingerprints and held entire \$150K. Took 6 months to resolve, business went bankrupt.

****Case 3: Affiliate Marketer Gets Blacklisted****

Mike ran CPA offers on Blogger, earning \$30K/month. Network detected multiple accounts and permanent ban, blacklisted email plus payment info. Cannot join any other networks.

The common point in all 3 cases: They didn't use proper fingerprint isolation.

The Solution: Antidetect Browser Technology

****Multilogin**** is the world's leading antidetect browser, trusted by tens of thousands of professionals in MMO Marketing. This isn't just a VPN or regular proxy - this is a COMPREHENSIVE solution to create completely independent browser profiles.

Core Features:

****1. Complete Fingerprint Isolation****

Each browser profile has completely unique fingerprint:

Separate Canvas fingerprint

Different WebGL vendor/renderer

Customizable Timezone, Language, Geolocation

Individual Font list, Screen resolution

Independent Audio context fingerprint

****2. Real Browser Cores****

Multilogin uses 2 browser engines:

****Mimic****: Based on Chromium (like Chrome)

****Stealthfox****: Based on Firefox

Not modified browsers that are easy to detect, but real browser cores with advanced spoofing.

****3. Selenium/Puppeteer Integration****

Automation-friendly for those who need:

Bulk posting on Blogger

Automated data scraping

Scheduled tasks

API-driven workflows

****4. Team Collaboration****

Share profiles with team members

Role-based access control

Cloud sync profiles

Centralized management dashboard

Case Study: Affiliate Network With 200+ Accounts

****Background****: David runs affiliate network, manages accounts for team members.

****Scale****: 200+ {platform} accounts across 10 team members.

****Previous Setup****: Each team member managed own accounts, inconsistent, 30% ban rate.

****New Setup With Multilogin****:

Multilogin Scale plan (1000 profiles)

Centralized management dashboard

Standard SOPs for all team members

Profile sharing and collaboration

****Impact**:**

Ban rate decreased from 30% to 2%

Team productivity increased 3x

Onboard new members in 1 day (vs. 2 weeks)

Monthly revenue: \$180K+ stable

****Lesson**:** *At scale, consistency is everything. Multilogin allows standardizing processes across entire team.*

Troubleshooting Common Issues

****Issue 1: {platform} still detects accounts****

Check proxy quality (datacenter proxies easy to detect)

Ensure fingerprint consistency (don't change settings)

Age accounts properly before activity

Verify timezone matches IP location

****Issue 2: Performance lag when opening multiple profiles****

Multilogin requires decent hardware:

Minimum: 8GB RAM, quad-core CPU

Recommended: 16GB+ RAM, octa-core CPU

Close unused profiles

Use profile groups and launch by batches

****Issue 3: Payment issues with code SAAS50****

Ensure entering correct code: SAAS50 (all caps)

Check that you're new customer (code for new users only)

Contact support if issue persists

****Issue 4: Selenium/Puppeteer won't connect****

Verify Multilogin API enabled in settings

Check port configuration (default: 35000)

Update Selenium/Puppeteer to latest version

Check firewall settings

Start Today

Every day you delay is a day:

Competitors are scaling while you're still struggling

Your accounts risk being banned anytime

Revenue potential limited by 1-2 accounts

****Simple action:****

****Step 1****: Click link below

SIGN UP MULTILogin WITH CODE SAAS50

Multilogin Official Site
